

DOUBLE U ARMCHAIR

M VICTOR FOXTROT

DOUBLE U resembles a light embrace. The chair's frame features a clear, organically curved line that encloses the body like a frame. Hence the name: the two pairs of legs, which are made of bent tubular steel, are shaped like up-side-down Us, while the armrest forms a closed geometry behind the back section and under the seat shell. Whether as an eye-catching solitary chair, restrained in colour or as part of a colourful troupe – DOUBLE U convinces with durability, comfort and iconic aesthetics.
