

MY AMI SIDEBOARD

M VICTOR FOXTROT

The MY AMI sideboard offers generous storage and display space. The construction of the sideboard plays with a slim and light silhouette. Made from powder-coated steel, the plate and foot form a laterally T-profile, while the frontal view shows soft oval, circle and square figures. MY AMI is characterized by its clear colors, available in two variants. The color takes on a key creative function: both the plate and the base consist of three layers, which are exposed in the foot via circular cutouts that become smaller towards the back. The panels layer on top of each other and appear to float thanks to the invisible profile struts. Those layers create visual depth and make the furniture look different from every angle.

Designed and produced in Hamburg.
