

KREUZZARGENSTUHL

M WB FORM

D MAX BILL

Kreuzzargenstuhl (cross-framed chair) is a lasting companion - not only strong and stable, but also balanced and beautiful. The leg construction in combination with the cross-frame structure supports the seat in the middle and gives the chair the greatest possible stability. The newest option of upholstery for the seat and backrest in leather or fabric provides further comfort.

The Kreuzzargenstuhl chair was designed in 1952 and has been produced ever since (since 1999 as a re-edition).
