

BUCKOWSKI

M das kleine b
D JENS BAUMANN AND MICHAEL BUCK

The buckowski is a modern, mobile workplace for home. It's elegant and sleek form fits into an office, living room, hallway, or bedroom. Buckowski's delicate appearance is due to a constructive trick: the graceful legs are invisibly reinforced with a steel profile + final stability is by leaning against a wall. The groove on the upper frame prevents rolling pins and provides space for postcards and memo pads. The legs have the same angle of inclination to the wall, and the same profile thickness as the ladder rack BRECHT (link), which makes them work very well together.

The Buckowski standing desk is available in the three colors: red, anthracite and light gray. Other colors can be ordered at an additional cost.
