TECHNICAL INFORMATION BULLETIN

PRODUCT: **WB 8005**

DESCRIPTION:

WB 8005 is a concentrated liquid treatment formulated to control solids deposition and scale formation in low and medium pressure boilers up to 900psi. In many applications continued use of WB 8005 will also effectively remove existing deposits. WB 8005 contains organic dispersants, sludge conditioners, phosphonates, sequestrants and anti-precipitants. This product has an excellent specific iron dispersant and sequestrant.

SPECIFICATIONS:

Specific Gravity: 1.14-1.16
Colour: Clear dark brown liquid
pH:..... 11.0-12.0
Odour: Musty
R.I.:..... 22-23

APPLICATION AND CONTROL:

WB 8005 can be fed neat as received or diluted with soft water to any convenient strength. WB 8005 is compatible with most boiler treatment chemicals and can normally be added to a common mix tank. WB 8005 should be added continuously proportionate to make-up or feedwater. Feed rate will vary depending on boiler design, boiler cleanliness, and feedwater quality. WB 8005 is approved for use in registered establishments.

PACKAGING:

23 Kg..... Pails
238 Kg..... Drums
1160 Kg..... Totes

PRECAUTIONS:

- Avoid contact with skin, eyes and clothing.
- Not for use in potable water systems.
- Consult M.S.D.S. and product label for additional information before handling.
