The cornerstone
(must have) tool for
all professionals.

WAHL®
PROFESSIONAL

Key Features

Precision 5-Star SMOOTH BOTTOM FADE BLADE

ADJUSTABLE TAPER LEVER for blending

Classic heavy-duty ALUMINUM BOTTOM CASE for years of durable wear.

Sleek design for comfort and less wrist stress while cutting. Ideal for smaller hands and maximum flexibility.

Powerful rotary motor supporting higher rpm for **INCREASED BLADE SPEED** and higher stall torque or **CONSISTENT POWER** to tackle thick hair

Includes **PREMIUM GUIDE COMBS: 1/2, 1 & 1 1/2"** (flat top styling comb also included) to ensure a seamless blend

70-minute run time. Cord/Cordless for continuous use

5-Star Smooth Bottom Blade for Precision Fades

THE BLADE
DESIGNED WITH
PERFECTION
IN MIND

Features

- Thin bottom blade with 13° bevel and extra-long teeth to pick-up and separate hair.
- Adjusts to zero-overlap for optimal closeness.
- Chrome Plated for rust resistance.

Benefits

- Thin, flat bottom provides ultra-close cutting for extreme results.
- Ideal for on scalp tapering/ fading, free-hand, sculpting (flat tops, beards (and skimming techniques).

There is a real need for an extreme Precision Blade in the barber world.

Both essential, but very different products

Cordless Magic Clip

Cordless 5-Star Senior

Stagger Tooth Blade

- The Cordless Magic Clip top cutting blade is the Stagger Tooth Blade (alternating teeth, different lengths) which provides two cutting paths a slightly textured result, which aids in blending (the second alternating 'staggered' tooth picks up the hair that was missed by the first path).

2191 Precision Fade Blade

- The 2191 Precision Fade Blade has one cutting path resulting in a very blunt, straight, clean, precision cut. This blade is must have staple for all barber's tools. It is powered by a rotary motor and the blades operate in a liner cutting motion. The zero-overlap blade slide mechanism is exclusive to the 5-Star line, it can truly be adjusted to zero overlap for on-scalp fading.

More power

New Cordless Senior motor provides more power:

- **26% faster motor speed** that is higher than the Magic Clip and Cordless Super Taper's motor.
- **15% faster blade cutting speed**, Cordless Senior clipper has of 6400-6900 rpm range compared to the Magic Clip's blade speed range of 5700-5900 rpm.
Using a higher rpm motor improves cut performance. If Blade speed is faster the blades can cut hair at a faster rate.
- **48% greater motor stall torque** that is higher than the Magic Clip and Cordless Super Taper's motor.
Using a higher stall torque motor improves cut performance since blades will resist stopping or losing speed while cutting through thick hair.
- **What does motor stall torque mean?** Basically it's harder to stop and it hits harder. Think of it like this:

This guy will hit with some power.

This guy hits with a lot more.

Horse power is how fast you hit the punching bag.

Stall torque is how far the bag moves when you hit it.

Premium Cutting Guides

Features

- Durable Metal Tabs with Glass & Mineral-Filled Plastic.
- Rounded Comb Teeth.

Benefits

- Metal tab securely fit onto blade safeguarding against popping off.
- Durable and rigid material will not warp.
- Separates the hair ensuring a more even cut.
- Glides through the hair providing your clientele a comfortable experience.

Appendix product comparison

PRODUCT	BLADE	RPM SPEED	RUN TIME	ATTACHMENTS	PURPOSE
 <p>Cordless Senior</p>	Precision Blade (fade blade)	6,400 - 6,700 rpm	70 min	3 premium attachment combs: # ½, 1, 1 ½	On-scalp fading with extreme power and blade speed, precision results maximum flexibility, minimal physical stress
 <p>Cordless Magic Clip</p>	Fixed, chrome blade with taper lever (stagger tooth top cutting blade)	5,500 rpm	90 min	8 attachment combs: # ½, 1, 1 ½, 2, 3, 4, 6, 8	On-scalp fading with maximum run time, flexibility and blending capabilities, minimal physical stress
 <p>Cordless Super Taper</p>	Fixed, chrome blade with taper lever (21 degree angle blade)	5,500 rpm	90 min	4 attachment combs: # 1, 2, 3, 4	On or off-scalp traditional tapering and fading. Maximum flexibility, minimal physical stress
 <p>Legend</p>	Fixed, Chrome Blade with taper lever (extended blade slide mechanism exclusive only to the Legend)	6,000 rpm	Continuous operation (corded)	8 premium attachment combs: # ½, 1, 1 ½, 2, 3, 4, 6, 8	Extended blade slide mechanism providing a wider fade range supported by the taper lever. *Note: if adjusted to zero overlap the extended blade slide feature is nullified

- The C/C Senior motor has optimal specs for cutting performance
- Blade speed rpms = blade rpms

 **NOTE:** the run time is 70 minutes. The reduction in run time is necessary to support the added blade speed and over all increased power providing the most advantageous results.
