Thank you for purchasing the Pulsar® APX Smoker V3! In order to ensure safe use, please read all instructions and safety warnings before operating. Failure to follow instructions may result in injury and may void your warranty.

FEATURES
- Isolated Airpath
- Zirconia Mouthpiece
- Built-in Stir Tool
- Pure Quartz Liner Chamber
- Ceramic Power Pad
- Replaceable Atomizer
- Auto Shut-off
- USB-C Charging

TECH SPECS
- Size: 20mm x 31mm x 87mm
- Input: DC 5V 1.5A
- Battery Capacity: 1100mAh Class A Lithium Battery
- Battery & Output: 3.78mA
- Atomizer Resistance: 0.4Ω
- Battery Recharge Cycle Count: 300
- Temperature Range: 950-1080°

CHARGING THE DEVICE

• IMPORTANT: You will need to fully charge your Pulsar® APX Smoke prior to use. Allow approximately 3 hours for the first full charge. NEVER charge the device for more than 24 hours. Allow approximately 1.5 hours for additional charges.

• A 5V/1.5 Amp USB AC wall adapter is required for charging the device. Using the included USB-C charge cord, set the Pulsar® APX Smoker on its side while charging. Do not let the unit dangle from the cord. This puts pressure on the charger plug which can result in the unit not charging fully. It is also recommended to NEVER charge the device from an automobile power source. Failure to follow warnings contained within this manual can result in property damage or personal injury and may void the warranty.

• The APX Logo LED will show a charging connection is made by slowly flashing red until fully charged. The indicator will change to solid green when completely charged.

• The device will deliver approximately 1.5 hours of continuous power, depending on use.

• Before using the device it is advisable to turn on the unit and allow it to heat up to turn off any of the manufacturing processes.

• Battery level display:
  - Green APX Logo = 100-60% Power Level
  - Orange APX Logo = 60-20% Power Level
  - Red APX Logo = 20-0% Power Level

• Low Battery: The APX Logo LED will flash alternating red & green 3 times and the device will not power on.

HOW TO LOAD & OPERATE

1. Remove the mouthpiece.

2. For best results, fill the chamber with grounded material. Use the built-in stir tool with the tamper end to lightly and neatly pack the chamber. Do not pack too tightly. This allows for even heat distribution and makes it easier to stir throughout the Smoking session.

3. Once dosed, replace the mouthpiece and turn the unit on by pressing the power button rapidly 5 times (5 Clicks for ON/OFF).

4. Once the unit is on, press the power button, or click the power button twice for hands-free mode. The LED will begin pulsing to indicate heating is in progress. The LED will turn solid once it is ready.

5. Allow the device to continue heating for approximately 7 seconds longer before inhaling. This ensures the herbs in the chamber are evenly heated, maximizing efficiency.

PRO TIPS

• Occasionally stir herbs and allow the chamber to reheat for 5-seconds between each inhales.

• To maximize efficiency, whenever possible, allow the unit to cool completely.

• Be sure to turn the unit off when you are done to preserve the material.

• Your Pulsar® APX Smoker is equipped with a 5-minute auto shut-off timer to further prevent waste and overheating.

HOW TO CLEAN THE MOUTHPIECE

The metal mouthpiece on the top has a friction fit and can easily be removed by pulling it away from the Smoker body with light force.

1. Pour enough isopropyl alcohol into a smoking container to cover the mouthpiece.

2. Place the mouthpiece in the container with isopropyl alcohol for one hour.

3. Remove and wipe with a cleaning wipe.

4. Rinse in cold water and dry with a hand towel or paper towel.

HOW TO CLEAN THE COIL CHAMBER

Since the heating element uses a coil-less heating pad, there is no worry of having to avoid touching exposed heating coils. These steps can be performed while the mouthpiece is soaking.

1. Make sure the Smoker unit is turned off and the heating coil element is cool.

2. Use an alcohol filled cotton swab or lightly dip a dry cleaning swab in 91% isopropyl alcohol.

3. Use the swab to wipe the inside of the coil chamber until clean.

4. Unthread and remove the coil from the Smoker body.

5. Use the cleaning swabs to wipe the coil housing of the Smoker body.

6. Re-assemble vaporizer and dry off before use.

CLEANING NOTES

• Do not use cleaning solutions, solvents, or other chemicals when cleaning the device. Doing so will result in undesirable tastes or smells and can cause potential health hazards.

• It is a good idea to clean the unit after each use to avoid excessive build-up, which will interfere with the taste and function of the device and may affect warranty status.

IMPORTANT SAFETY WARNINGS

• Do not expose to extreme temperatures or direct sunlight.

• Do not drop the device or accessories.

• Do not drop or submerge in any liquid.

• Do not modify the electronics in any way.

• This device is intended for adults only. Do not sell or provide to minors. Keep all parts, concentrates, herbs, and liquids away from children and pets. This is not a medical device and is not intended to diagnose, treat, mitigate, cure, or prevent any ailment, disease, or other conditions. Consult a physician before use, especially if you suffer from heart disease or any other medical condition, or if you are pregnant or breastfeeding. Failure to follow any of these instructions could result in product damage, property damage, personal injury, and may void warranty.
