Thank you for purchasing the Pulsar APX Vapel! In order to ensure safe use, please read all instructions and safety warnings before operating. Failure to follow instructions may result in injury and may void your warranty.

**FEATURES**
- Isolated Airpath
- Built-in Stir Tool
- Larger Ceramic Chamber
- 5 Preset Temperatures
- Haptic Feedback
- Cash Mode
- Auto-Shut Off

**TECH SPECS**
- Size: 31mm x 23mm x 101mm
- Input: DC 5V, 1.5A
- Battery Capacity: 1600mAh Class A Lithium Battery
- Battery Recharge Cycle Count: 300

CHARGING THE DEVICE

- IMPORTANT! You will need to fully charge your Pulsar® APX Vape prior to use. Allow approximately 3 hours for the first full charge. NEVER charge the device for more than 24 hours. Allow approximately 1.5 hours for additional recharges.
- A SWI 5 Amp USB AC wall adapter is required for charging the device. Use the included USB orange cord, set the Pulsar® APX Vape on its side while charging. Do not let the unit dangle from the cord. This puts pressure on the charger plug which can result in the unit not charging fully. It is also recommended to NEVER charge the device from an automobile power source. Failure to follow warnings contained within this manual can result in property damage or personal injury and may void the warranty.
- The APX Logo LED will show a charging connection is made by slowly flashing red until fully charged. The indicator will change to solid green when completely charged.
- The device will deliver approximately 1.5 hours of continuous power, depending on use.

BATTERY LEVEL DISPLAY:

- **Green APX Logo = 100-60% Power Level**
- **Orange APX Logo = 60-20% Power Level**
- **Red APX Logo = 20-0% Power Level**
- **Low Battery:** APX Logo LED will flash alternating red & green 3 times and the device will not power on.

HOW TO LOAD & OPERATE

1. With the Pulsar® APX Vape upright and the button facing you, lightly pull on the mouthpiece towards you until it is released.

2. For best results, fill the chamber with ground up dry material halfway to three-quarters full. Use the built-in stir tool with the tamping end to lightly and neatly pack the chamber. Do not pack too tightly. This allows for even heat distribution and makes it easier to stream through the vapor session.

3. Once loaded, replace the mouthpiece and turn the unit on by pressing the power button 5 times (5 Clicks for ON/ OFF).

4. The Pulsar® APX Vape returns to the last set temperature when powered on. To change the temperature, press and hold the power button for 3 seconds. The LED indicators will begin to cycle through the temperature settings until you release the button.

5. The device will begin heating immediately once the temperature setting is selected. The LED will begin pulsing to indicate heating is in progress. The LED will turn solid, and the Haptic Feedback feature will alert you that the Pulsar® APX Vape has reached the desired temperature.

6. Allow the device to continue heating for approximately 5 seconds longer before inhaling. This ensures the herbs in the chamber are evenly heated, maximizing efficiency.

7. To adjust the temperature during a session, press and hold the power button for 3 seconds to cycle through the settings again. Release the button on the desired setting and allow the Pulsar® APX Vape to adjust to the new temperature. The LED will begin pulsing, and wait for the Haptic Feedback before continuing the session.

8. **CASH MODE:** The Pulsar® APX Vape is equipped with a specially tuned temperature setting that allows the user to quickly click or “cash” a chamber. The fifth and highest setting, also designated with a red LED, heats at a higher temperature, and has a shorter auto-shutoff time. Perfect for making sure that what you have in your chamber is spread, or for those times when you need to be in a hurry!

**PRO TIPS**

- Occasionally stir herbs and allow the chamber to reheat for 5 seconds between each inhale.
- To maximize efficiency, whenever possible, allow the unit to cool completely.
- Be sure to turn the unit off when you are done to preserve the material.

9. Your Pulsar® APX Vape is equipped with a 5-minute auto-shut-off timer to further prevent waste and overheating. The Cash Mode is equipped with a 2.5-minute auto-shut-off.

**HOW TO CLEAN**

1. Remove the mouthpiece.
2. Tap out the material from the chamber or use the built-in stir tool to manipulate the material.
3. Use the included cleaning brush to sweep the remaining residue from the chamber.
4. A cotton swab and isopropyl alcohol can be used to clean stubborn residue. Do not pour alcohol directly into the chamber.
5. Allow the device to dry completely before use.

**IMPORTANT SAFETY WARNINGS**

- Do not expose to extreme temperatures or direct sunlight.
- Do not drop the device or accessories.
- Do not drop or submerge in any liquid.
- Do not modify the electronics in any way.
- This device is intended for adults only. Do not sell or provide to minors. Keep all parts, concentrates, herbs, and liquids away from children and pets. This is not a medical device and is not intended for diagnosis, treatment, cure, cure, or prevent any ailment, disease, or other conditions. Consult a physician before use, especially if you suffer from heart disease or any other medical condition, or if you are pregnant or breastfeeding. Failure to follow any of these instructions could result in product damage, property damage, personal injury, and may void warranty.
