HOW TO USE (CONCENTRATES)

Unscrew the bottom storage container and remove the mouthpiece. Using the built-in dab tool, load a small amount of wax into the coil, then close and reattach the storage container.

Align the notches on the airflow cap with the coil ends, so that the dab tool aligns with the coil, then reattach the mouthpiece so that it fits snugly.

Click the power button 5 times to turn ON.

Click the button 3 times to cycle through the heat settings, until you find your preferred voltage (green light - 2.7v, blue light - 3.0v, red light - 3.3v).

Hold the button and gently draw on the mouthpiece, while keeping the pen upright, and enjoy!

Pulsar Pro Tip: For lower heat settings, you may want to gently puff until vapor is produced, and then begin your inhale!

For hands free use, tap the power button twice to activate 10-second hands-free Sesh Mode. To power down from Sesh Mode before the 10-second timer, press the power button once.

HOW TO USE (510 CARTS)

Remove the mouthpiece and upper housing, set aside. unscrew and remove Clapton Coil, set aside. Screw in the included 510 adapter. Follow steps 3-7 similar to CONCENTRATE USE.

BATTERY LEVEL INDICATOR

When the device is turned on, the side lights will show the battery level.

- Green light - full battery
- Blue light - medium battery
- Red light - low battery

CHARGING

Use the included USB Type-C charging cable. The device will flash a red light. When the light turns green, the device is fully charged. A full charge will take under two hours.

HOW TO CLEAN

Soak the coil in isopropyl alcohol overnight. Allow coil to air dry completely. Fire the device on high to ensure no isopropyl residue remains. We recommend changing the coil every 2-4 weeks.
