

► ASCH SCONCE

We are excited to introduce our latest collaboration featuring exquisite hand-made art tile from Pratt & Larson. The sconce features a lovely, low profile linen shade that elegantly diffuses light in all directions and highlights the beautiful dimensional art tile texture and artisan glaze.

Drawing inspiration from northwest regional sculptors from the 1960s & 70s, this original design was carved by new Pratt and Larson company owner Anthony Asch. His design features a curvaceous, organic composition with a subtle botanical influence.
