Smart plug & play system

for build-in sensor

Motion sensor

(Additional Purchase)

Without any wiring and tool, one second to assemble.

# **HYPERLITE** LED Luminaire

Industrial LED High Bay Lighting (RADAR Series)

·UL No E483348 Suitable for Wet Locations

#### BEFORE YOU INSTALL Read these instructions completely and carefully.

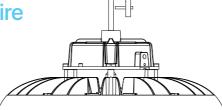

#### A WARNING

RISK OF ELECTRIC SHOCK • Turn power off before inspection, installation or removal. • Properly ground electrical enclosure. • Follow all NEC and local codes.

Use only UL or IEC approved wire for input/output connections.

#### Save These Instructions

Use only in the manner intended by the manufacturer. If you have any questions, contact the manufacturer.

#### **Prepare Electrical Wiring**

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

|   | 1.Please check that the plug is in good condition.<br>Install the lamp and plug it into the socket.<br>Then you can test the light fixture.  |
|---|--|
| 4 | 2.Please connect the input wire in correct way,<br>Black or Brown wire is L, White or Blue wire is N,<br>Green or Green-yellow wire is ground connection.<br>Please also make sure the wire connection is<br>fixed perfectly before using. |

### **READ THOROUGHLY BEFORE INSTALLATION**

WARNING! FIXTURES MUST BE GROUNDED and installed in accordance with the National Electrical Code and all local codes. Failure to do so may increase the RISK OF PERSONAL INJURY, PROPERTY DAMAGE, FIRE AND DEATH.

WARNING! Dangerous voltage exist within the unit and all precautions usually observed in handling high voltage equipment should be observed when replacing light engine or otherwise servicing luminares. Disregarding this warning could result in electrical shock and possible injury to the individual installing or servicing this equipment. Installation, service and maintenance of luminaires should be done by a qualified licensed electrician.

**CAUTION!** To reduce the risk of death, personal injury or property damage from fire, electric shock, falling parts, cuts/abrasions, and other hazards please read all warnings and instructions included with and on the fixture box and all fixture labels.

## A NOTE!

- This equipment is only for professional installation. Non-professional personnel shall not remove or install the equipment.
- To avoid damage, falling, electric shock or fire, please do not modify the lamp or replace accessories without confirming with the supplier.
- Maintenance/installation and replacement the lamps , please confirm to cut off the power supply, and the lamps have set up a cooling. Please make sure the lamps properly installed before processing power.

- Ensure the accurate and reliable connection.

- Ensure that the product around the vent, the lamp cannot violate any fire prevention regulations when using.

Carefully read these instructions before installing product and keep it for future reference. If you do not understand these instructions, before starting any work, contact service@hi-hyperlite.com or (855) 688-7879.

# FOOTCANDLE LIGHT GUIDE

Footcandles are the most common unit of measure used by lighting professionals to calculate light levels in businesses and outdoor spaces. A footcandle is defined the illuminance on a one square foot surface from a uniform source of light. The Illuminating Engineering Society (IES) recommends the following footcandle levels to ensure adequate illumination and safety for occupants. Below is a guideline for common areas to assist in achieving appropriate light levels with the greatest energy-efficiency.
