DIMMING INSTRUCTIONS

Note: Switch on and off within 3 seconds to jump to the next brightness. The next time the light is turned on, it will maintain the last brightness.

INSTALLATION

- Connect the tubes by series as follows, each red circles requires its own power source.

CAUTION!!

- Please be careful when connecting the light bars with the connectors. Don't damage the copper needle in the connectors.
- Make your desired pattern and test it before installing it on the ceiling.
- Only 2 connectors for AC input cord:
Black - Line
White - Neutral
Green - Ground

Note: The number of cables needed is dependent on the size and amount of lighting tubes. (1 cable per 65 six-watt tubes or 25 sixteen-watt tubes, max: 400W connection.)

1. Connect the 90°L connector
2. Connect the 120°V connector
3. Connect the 180°I connector
4. Connect the 120°Y connector
5. Confirm the connect AC input connector
6. Confirm the connect AC input connector

- How to install it on the ceiling.

1. Grid roof - Tie it with zip ties
2. Flat roof - Screw the connector from the hole to the ceiling directly

Remarks:
1. There should be 2 wires out to connect with 120V;
2. Please install by professional electrician;

⚠ WARNING

Please do not match the connectors by violence, it would damage the whole set of lamps. If it does not match the lamps well, please try to joint accurately or change the lamp, do not damage the connectors by violence. Test by AVO meter before powering on.

The well made copper parts ! The deformed copper parts by violence
