Tiny Treat Size!

## Diabetic Cookies

These cookies promote wellness by combining herbs and natural ingredients known to regulate blood sugar, helping dogs better manage insulin requirements.

Old Dog Cookie Company's Diabetic Dog Treats contain ingredients known to reduce blood sugar. Fiber and herbs combine to help slow the rate of food metabolism, allowing your dog to better manage its insulin requirements. The pectin in our applesauce helps boost your dog's immune system and control blood sugar levels. Garlic in very small amounts helps to reduce blood sugar and stimulates the digestive system. Dandelion helps to reduce amounts of sugar in the blood. Squash is a source of vitamin A. Kelp helps with thyroid function as well as promoting healthy skin and coat. Each ingredient in our Diabetic Treat is there to support a healthier life for your pet. Diabetic pets need regular veterinary care, consistent exercise, and proper diet to help stabilize insulin requirements. Old Dog Diabetic Treats can help make caring for your diabetic pet a little easier.

**Ingredients:** Stone ground whole wheat flour, oats, alfalfa, unsweetened applesauce, pumpkin, brewers yeast, kelp, garlic, dandelion root, cider vinegar, water

Protein (Min) 10%, Fat (Min) 1%, Fiber (Max) 7%, Moisture (Max) 20%, Salt (Max) 0.5%

## Arthritis Relief Cookies

These cookies promote wellness by combining herbs and natural ingredients known to help maintain optimal joint function and relieve stiffness.

Old Dog Cookie Company developed Arthritis Relief Dog Treats when our dog Jetty developed signs of arthritis. By supplementing her diet with treats containing herbs, vitamins, minerals and essential elements known to build strong joints and relieve inflammation, Jetty was her playful self again. A key ingredient in our cookies, Alfalfa is an anti-inflammatory used to reduce the discomforts of arthritis. Proper amounts of vitamin C are necessary for good adrenal function, without them Jetty couldn't make enough cortisone, resulting in arthritic symptoms. That's why pure applesauce is in our cookies. Honey is added to promote energy, healing and for its natural antiseptic qualities. Our carefully crafted treats contain quality ingredients, each with a specific purpose, to help support a healthier life for our dog and all the dogs in our Old Dog Cookie family.

**Ingredients:** Stone ground whole wheat flour, oats, alfalfa, unsweetened applesauce, honey, kelp, brewers yeast, kelp, raspberry leaf, cider vinegar and water
