

West Coast Seeds

2020 Fundraising Seeds

We have selected 65 of our best-selling varieties of flower, vegetable, and herb seed packets to provide "something for everyone".

All our seeds are Untreated and Non GMO, with germination rates exceeding Canada Number One standards. All our seeds are

suitable for organic growing.

Each seed packet sold will earn you 40% profit off the packet price.

Kitchen Basil Blend HR1011

- Genovese basil has big smooth green leaves for use in pesto and pasta
- Red Rubin brings distinctive colour and pungent flavour to salads and vinegars
- Cinnamon basil leaves are lovely as a garnish. Use the flowers in salad

Genovese Basil HR1019

- Original pesto basil from Italy
- Large shiny almond-shaped leaves have a pronounced flavour and flowers are edible
- Great for containers
- Height to 60cm (24")

German Chamomile HR1057

- Sow in early spring and again in late summer.
- Gather the petite, daisy-like flowers before they fully open.
- Use them fresh or dried for a soothing tea or in many medicinal preparations.

Chives HR1065

- Hardy, perennial, and easy to grow
- The chopped stems and pink flowers add a fresh, mild green onion flavour to sandwiches, salads and baked potatoes
- If grown in containers, divide frequently enough to provide for constant lateral growth

Cilantro Santo Long Standing HR1073

- Slow bolting and frost-tolerant
- Direct sow every two weeks from spring to late summer for continuous harvest
- The mature seeds are called coriander
- It will grow in full sun to partial shade
- Use deep pots for tap roots to grow

Ella Dill HR1024

- A dwarf dill that is ideal for containers, and works well in outdoor gardens
- Its short leaf internodes keep the plants compact and bushy, without reducing the pronounced fragrance and classic dill flavour.

Summer Savory HR1137

- Grow this delicate, aromatic herb in rich, fertile soil and full sun.
- Its refined flavour complements pea, bean, and lentil dishes particularly well.
- After flowering, pull it up and hang to dry. The stems grow to 25cm (10") tall.

Peppermint HR1090

- Hot, rich mint aroma
- Spreading perennial plant, grow in containers to control growth
- Both the leaves and flowers can be dried for teas or used in stews and sauces

Spearmint HR1185

- Spearmint has a milder flavour with fruitier undertones than peppermint.
- It is easy to grow, and fast, too.
- Its vigorous growth is easy to control by growing in containers, or by lifting clumps once a year for division.

Parsley Forest Green PL570

- Flat, dark green leaves are deeply cut, with a rich parsley flavour
- Ideal for cooking or salads
- Easy to grow, sturdy plants with upright stems.

- F1, 55 days
- Highly uniform and reliable
- Large, deep red roots with smooth skins
- Hybrid disease resistance

Everest Broccoli BR182

- F1, 50 days
- Very sweet and tasty
- Ideal for late summer and fall harvests
- Heads to 10-15cm (4-6") wide

**Multi-Colour Cauliflower
Blend CF317**

- F1, 70-88 days
- Green, orange, and purple heads
- Rich cauliflower flavour
- Very rich in nutrients
- Amusing on the plate

**Rainbow Blend Carrots
CR279**

- 75-110 days
- Blend of purple, white, red, yellow, and orange carrots
- Packed with nutrients and great flavour
- Repeat sowings will provide harvests from late spring to winter.
- Popular with kids

Bolero Carrots CR283

- OP, 65-70 days.
- An heirloom grown for 50 years and often out-performs hybrids
- Great flavour and strong tops on 18cm (7") carrots that colour up early for harvests as baby carrots

Yaya Carrots CR300

- F1, 65-70 days
- Smooth skinned and uniform
- Strong tops for bunching
- Incredible flavour that gets even sweeter after frost

**Jubilee Super Sweet Corn
CN370**

- F1 (sh2), 85 days
- Incredibly sweet with deep yellow kernels
- 20-23cm (8-9") long ears
- Tall, 2.4m (8') plants

Mercury Cucumber CU395

- F1, 55 days
- A standout for flavour and productivity
- The fruits grow 20cm (8") long
- Suitable for pickling if picked early

**Patio Snacker Cucumber
CU381**

- F1, 50-55 days
- Compact little plants that are suitable for containers
- Full sized slicing cucumbers
- Try growing in hanging baskets

Summer Kale Blend KL419

- 40-60 days
- Three varieties that thrive in summer heat
- Excellent as baby leaf greens
- Tender and tasty

Winter Kale Blend KL420

- 50-80 days
- A blend of our most popular cold hardy varieties
- Leaves get sweeter after frost
- Harvest throughout late fall and winter

Tom Thumb Lettuce LT490

- OP, 50-70 days
- The oldest American heirloom Bibb
- Small - only the size of a tennis ball
- Excellent in containers
- Forms a sweet, blanched heart

**City Garden Lettuce Blend
LT450**

- Multi-seed pellets make planting easy
- A blend of green and dark red lettuces
- It looks amazing grown in containers
- Diverse shapes, colours, and textures

**Super Gourmet Salad
Blend LT455**

- OP, 60 to 80 days
- A blend of five very popular lettuce varieties: a buttercrunch, a red-leaf, a romaine, and two green-leaf lettuces
- Sow small amounts regularly for a continuous harvest
- Pretty enough for the flower garden
- Full of nutritious flavour

Starhawk Lettuce LT476

- OP, 46 days
- Densely packed romaine type
- Very upright shape
- Good disease resistance
- Resistance to bolting
- Certified organic seeds

- Saladini Salad Blend MS479**
- A wide range of leaves intended for harvest as baby salad greens
 - Mild, sweet flavour that is good in salads and excellent in stir-frys
 - Includes choy sum, mizuna, pac choi, mustard, red lettuce, and spinach
 - Cut and come again harvests

- Sugar Baby Watermelon ML865 Certified Organic**
- OP, 82 days
 - The classic heirloom icebox type melon dates back to 1959
 - It has a thin, hard rind with firm, sweet, and orangey red flesh with small seeds
 - The round fruits grow to around 18cm (7") in diameter

- Red Wing Onion ON558**
- F1, 110 days
 - The ultimate red-skinned storage onion
 - Globe-shaped bulbs 7-10cm (3-4") across
 - Superior flavour
 - Easy to grow

- Ramrod Onion ON571**
- OP, 65 days
 - Summer and fall production
 - White bulbing Lisbon type with stiff green leaves
 - Increase the white stem length by planting in trenches and hilling up

- Walla Walla Onion ON585 Certified Organic**
- OP, 150 days spring sown/300 days fall sown
 - Forms very large bulbs with sweet, mild flavour and crisp, juicy flesh
 - Overwinter by sowing in August
 - Direct sow or start transplants from late July to August 15th. Hardy to -23°C (-10°F)

- Alderman Peas PE591**
- OP, 70-78 days
 - Exceptional flavour
 - Large pods with 8 or 9 peas each
 - Trellis the tall vines and keep them picked for a long harvest period

- Oregon Sugar Pod Peas PE598**
- OP, 56 days
 - Edible pod snow peas
 - Very sweet, crisp pods
 - Pods grow to 10cm (4") long
 - White flowers grow on short vines
 - Enation resistant

- Super Sugar Snap Peas PE616**
- OP, 62-70 days
 - An improved version of Sugar Snap
 - 10cm (4") long, plump pods grow in pairs at each node for improved yield on 1.5-2m (5-6') tall vines
 - Not enation resistant
