How to fold and connect the folders for your lapbook.

1. Gather the number of folders required for your particular lapbook

2. Open up each folder and flatten it out.

3. Take the right side and fold it all the way over until the tab is just before the middle crease in the folder. Do not overlap this crease with the tab.

4. Fold the left hand side over just to the crease but not overlapping it. Your folder now has two flaps. We like to use a ruler down each fold to make the fold neater and flatter. Do steps 3 and 4 to the remaining folders.

5. Take two of the folders and apply a generous amount of glue to their flaps.

6. Bring the flaps together and press so they stick together.

7. Do steps 5 and 6 to your remaining folders (if any).

8. We provide the patterns for all the mini-booklets. Just cut out, construct and glue them into your lapbook. Refer to the color-coded placement page or the actual mini-booklet page for placement of each mini-booklet.

Cut out the two big pieces. Cut out the “window” and put title on front in box. Cut out the separate rectangles and draw pictures on them. Glue in the correct order inside the booklet. (This booklet works well for showing something in stages, like the growth from eggs, to tadpoles, to a frog.) Stack both big pieces on top of each other and fasten with a brad so top piece can rotate around. Glue into lapbook.
