<b>LEVITON</b>	<b>RDL06-10Z</b>
<b>CLOUDY BAY</b>	<b>CBLDOO1WH</b>
<b>LEGRAND RADIANT</b>	<b>RHCL453PW</b>

We highly recommend using a ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

\*May experience “pop-on” behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
