

5/6" Selectable Disk Downlight Dimmer Compatibility Guide

This compatibility list is based on testing conducted by the manufacturer in a lab simulated environment. Actual results may vary.

BRAND	MODEL
LUTRON	MACL-153M
LUTRON	DVCL-153P
LUTRON	PD-6WCL-WH-P
LUTRON	AYCL-153P
LUTRON	P-PKG1WB
LUTRON	SCL-153P
KASA SMART	HS220
CLOUD BAY	CBLD001

We highly recommend using a ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

*May experience "pop-on" behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
