

6" LED DISK DOWNLIGHT

Dimmer Compatibility Guide

This compatibility list is based on testing conducted by the manufacturer in a lab simulated environment. Actual results may vary.

BRAND	MODEL
LUTRON	DV-600P
LUTRON	DVCL-153P
LUTRON	MACL-153ME
LUTRON	MACL-153MR
LUTRON	SCL-153P
LUTRON	TG-600PH-LA
LEVITON	153M-ES
LEVITON	CL-6672
LEVITON	CL-6674
LEVITON	CL-6683
LEVITON	IPL06

We highly recommend using a ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

*May experience "pop-on" behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
