Sunco

6" ULTRA-SLIM SELECTABLE DOWNLIGHT

Dimmer Compatibility Guide

This compatibility list is based on testing conducted by the manufacturer in a lab simulated environment. Actual results may vary.

BRAND	MODEL
LUTRON	MACL-153M
LUTRON	DVCL-153P
LUTRON	MACL-153MH
LUTRON	CTCL-153PDH
LUTRON	P-PKG1W
LUTRON	DVELV-300P
LUTRON	SLV-600P
LUTRON	TGCL-153P
LUTRON	P-PKG1WB

BRAND	MODEL
LEVITON	6672 600W
LEVITON	RDL06-001-10Z
EATON	SAL06P3
LEGRAND	RHCL453PW
WATTSTOPPER	DCD267
WEMO	F7C059

We highly recommend using a ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

*May experience "pop-on" behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
