

PAR20 BULB

Dimmer Compatibility Guide

This compatibility list is based on testing conducted by the manufacturer in a lab simulated environment. Actual results may vary.

BRAND	MODEL
LUTRON	AYCL-153P-WH
LUTRON	DVCL-153P-WH
LUTRON	MACL-153M-WH
LUTRON	PD-6WCL-WH-P
LUTRON	P-PKG1WB-WH
LUTRON	SCL-153P-WH
LEVITON	D26HD-2RW
Amazon Basics	Smart
Cloudy Bay	CBLD001WH
TP LINK	Kasa Smart HS220

We highly recommend using a ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

*May experience "pop-on" behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
