

2X2 DUAL SELECTABLE LED PANEL

Dimmer Compatibility Guide

This compatibility list is based on testing conducted by the manufacturer in a lab simulated environment. Actual results may vary.

MODELS

PN22_DU-WH-4060K

BRAND	MODEL
LUTRON	DVSTV
LUTRON	NTSTV-DV
LUTRON	DVTV
LEVITON	AWSMT-7DW
LEVITON	DD710-BDZ
LEVITON	DS710-10Z
LEGRAND	WS4FBL3PTC
LEGRAND	RH4FBL3PTC
COOPER	SF10P
HUBBELL	LHD-IRS3-N-WH

We highly recommend using an ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

*May experience “pop-on” behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
