

GERMICIDAL UVC LIGHT

Install Guide and Manual

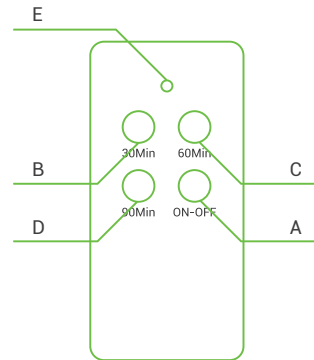

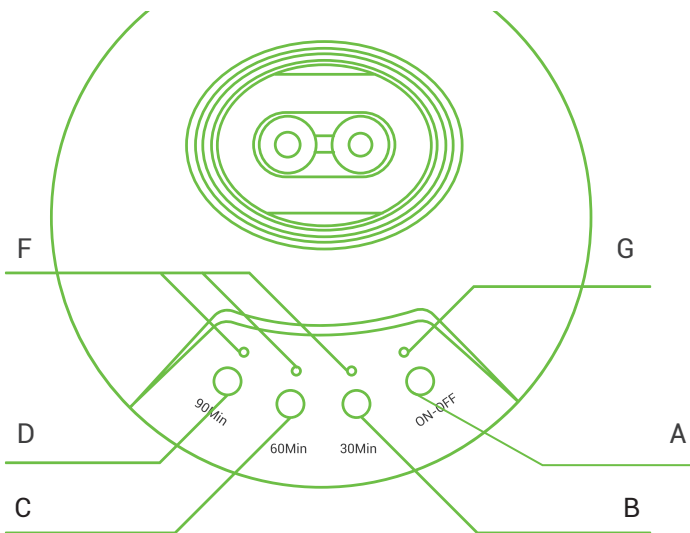

OPERATION INSTRUCTIONS

BEFORE USE: Remove all people and pets from the room and be prepared to leave the room yourself within a 20 second countdown after activation. Review all stated warnings and important notes.

Unpack the UV lamp. Check whether the product is in good condition and whether the surface of the lamp is clean. Wipe up oil or dust immediately otherwise the sterilization effect will be affected.

CONTROL PANELS & STERILIZATION TIME

WARNING

To reduce the risk of fire, electric shock or injury to people:

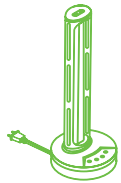

- Read all the instructions and save this sheet.
- Do not look directly at ultraviolet light source.
- Do not use around people, animals, or plants. Leave area prior to use.
- After use, do not enter the sterilized space immediately, wait 30 minutes.
- Ultraviolet lamp is fragile. Keep away from children or pets to avoid injury.
- Cover any collectibles, antiques, calligraphy, or paintings with cloth or paper before using UVC light.
- Suitable for damp/dry locations.
- Do not alter the plug or power supply cord in any way or try to install this product in any other method not indicated on this sheet.

- Not for use with dimmers.
- Power cord cannot be concealed or extended through a wall, floor, ceiling, or other parts of the building structure. Use only insulated staples or plastic ties to secure the power supply cord.
- Not suitable for ceiling and wall installation.
- Do not modify the equipment.
- Abide by related regional and local laws or regulations.
- Check for damage during shipping prior to install. If the product is damaged, do not use it.
- Use safety precautions. Safety eyeglasses and gloves are recommended.

Germicidal UVC
Light

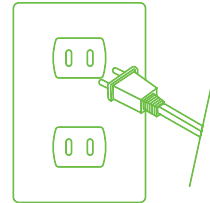

X1
Remote
Control

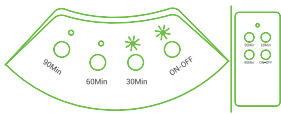

EASY INSTALLATION

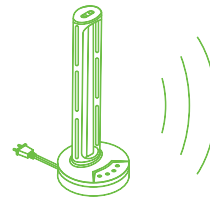

1. Place the UVC light on a table or the floor to operate it.

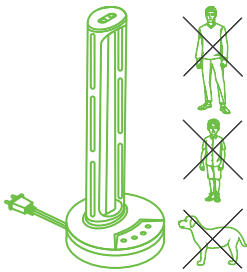

2. Plug in the UVC Light. The ON-OFF light (G) will illuminate.

3. Select the corresponding button (B, C, D) on the fixture or remote control to set the sterilization time. (See Control Panel chart)

4. When the corresponding time signal lamp (F) flashes and the countdown 20 second alarm sounds, step away from the UVC light.

5. Prevent adults, children, and pets from entering the radiation range during UVC lamp operation.
Do not look at ultraviolet light source when illuminated.
If there is a moving person or object close to the radiation area (within 10ft/120 inches), the UV lamp will detect movement and enter a protection mode. The light will shut off. To continue, press ON-OFF, then repeat step 3 to restart the UV lamp. Remember to leave the radiation area within 20 seconds.

6. Wait 30 minutes after UVC light has finished its cycle before entering the radiation area.
7. Unplug and carefully store the UVC light away from children and pets.

IMPORTANT

- This fixture complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- The UVC light will enter protection mode when the radar sensor failsafe is activated by movement of a person or animal within 10 feet (120 inches) of the product.

REMOTE PAIRING

Each remote is paired to control a single UVC light. You can unlock and rematch a remote to multiple UVC light fixtures.

- 1. UNLOCK:** Unplug second light. Plug in second light. Using remote from first light, press and hold the remote's ON-OFF button for 2 seconds, until you hear the alarm sound continuously.
- 2. REMATCH:** Unplug second light again, then plug in same light. Press and hold ON-OFF on remote for 2 seconds, until you hear the beeping.
- 3. PAIRED:** You can now control both lights with a single remote.
