

LED DUSK TO DAWN WALL PACK

Dimmer Compatibility Guide

This compatibility list is based on testing conducted by the manufacturer in a lab simulated environment. Actual results may vary.

MODELS

WP_DD-BR

BRAND	MODEL
LUTRON	NTSTV-DV
LUTRON	NFTV-IV
LUTRON	DVTV-WH
LEVITON	IP710
LEVITON	DS710-10Z
LEGRAND	RH4FBL3PW

We highly recommend using a ELV (electronic low voltage) dimmer compatible with LED lights. Buzzing or flickering is typically an indication that the dimmer and lights used are not compatible. Please consult dimmer manufacturer for maximum wattage capacity.

*May experience "pop-on" behavior, in which lights cannot be turned on immediately to their minimum level. To resolve this issue, first raise the slider switch above the minimum level to turn the lights on, then dim to a lower light level as needed.
