

CELLECTA

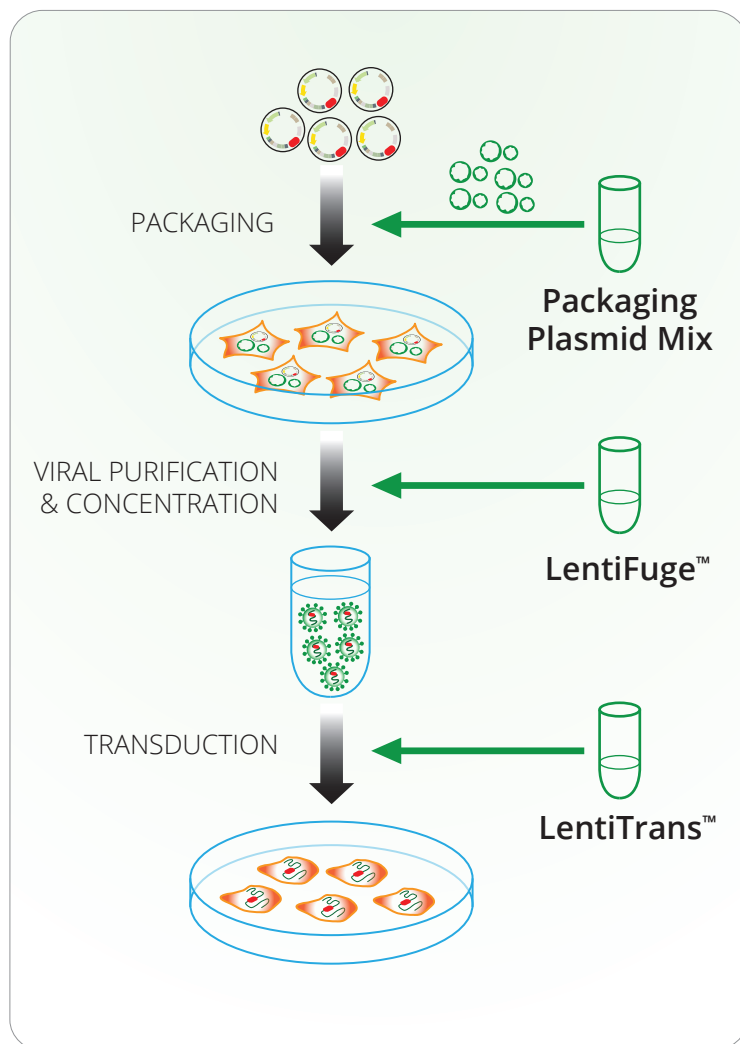

## Convenient Set of Three Reagents and a Control Plasmid to Start your Genetic Screen

- Ready-to-use Packaging Mix
- Lentifuge™ Concentration Reagent
- LentiTrans™ Transduction Reagent
- Control plasmid with either GFP or RFP to test packaging and transduction efficiency

Cellecta's LentiPrep™ Reagent Set includes what you need to get started. You get ready-to-use reagents for packaging, isolation and transduction, together with an additional free lentiviral control to optimize protocols for your cells. And the price of the bundle is more economical than purchasing each reagent separately.

Try the LentiPrep reagent set today.
