

JOEY POUCH

The TPG BLACK™ Joey Pouch offers a solution for “more loadout space” while keeping a low profile. The Joey is one of the most versatile pouches available in today’s market. The design includes a, hook and loop, Velcro® flap attachment that can be mounted to most plate/armor carriers available on the market. The Joey Pouch has three (3) pockets. The front & middle pockets are lined with an elastic loop to secure items. The third pocket is located in the back & can be used to insert armor for added protection. The size of the pouch can be adjusted by the shock cord, located on both ends. It serves a dual purpose to secure other items for quick access. PALS webbing, Velcro® brand loop on the front and 2 elastic loops at the bottom allow user to fasten additional items.
