1200.2 SAS SSD

The Seagate® 1200.2 SAS SSD family includes high-capacity, high-performance SAS SSDs designed with multiple endurance offerings optimized for demanding enterprise applications and improved TCO.

Key Features and Benefits

- Dual-port 12Gb/s SAS interface
- Industry-leading storage density range up to 4TB-class capacity
- Ultra-fast performance of up to 1900MB/s
- Endurance options for a wide range of enterprise workloads
- Redundant, failover I/O communication
- Power loss data protection circuit
- Superior data security
- Advanced error correction

Best-Fit Applications

- Server virtualization
- OLTP databases
- Software-defined storage
- All flash arrays
- Caching and tiering

SEAGATE SECURE™

Industry-Leading Performance up to 1900MB/s

The 1200.2 SAS SSD family delivers ultra-fast, consistent and easily scalable performance that exceeds 12Gb/s SAS single-port bandwidth. By removing the storage bottleneck, it closes the gap between processor and data storage performance and significantly improves overall system and application responsiveness. The 1200.2 SAS SSD family also provides consistent low-latency data access, reliably accelerating enterprise and cloud storage systems.

High-Capacity Solution With Multiple Endurance Offerings

Enterprise applications have different storage workload requirements for performance, endurance and cost. The optimal storage solution for databases or virtualization with a typically mixed read/write workload, for example, requires the highest random read/write IOPS, ultra-low latency and high endurance. Content streaming applications with highly intensive read workloads, however, demand high sequential read throughput and high storage density at the lowest cost per gigabyte. The 1200.2 SAS SSD family offers an industry-leading range of capacities, including 4TB-class in a 2.5-inch form factor, to increase enterprise storage density in data centers. It also enables lower TCO by offering four endurance categories to match cost and performance requirements of all enterprise workloads.

Enhanced Enterprise Reliability, Data Protection and Security

The 1200.2 SAS SSD family leverages Seagate's decades of enterprise SAS expertise and proven feature set to deliver the highest levels of reliability, data integrity and data security for mission-critical enterprise applications. The 1200.2 SAS SSD family helps deliver exceptional data protection and reliability by integrating full internal and external data path protection (T10 DIF), Seagate's advanced ECC algorithms, media life-cycle management and other techniques for extending flash memory life. With advanced power-loss data protection, the 1200.2 SSD maintains high data integrity to help prevent loss of user data in the event of unexpected power interruptions. The 1200.2 family implements security features to prevent unauthorized access to a drive and safeguards stored data with three levels of security, including Secure Downloads & Diagnostics, TCG-compliant Self-Encrypting Drive and FIPS drive.[1]

1 Self-Encrypting Drives (SED) are not available in all models or countries. May require TCG-compliant host or controller support.
