

RING SIZING GUIDE

Have a Ring you already love the fit of? Use this chart to find its size.

Step 1 PRINT

Print this page on a piece of 8.5" x 11" paper, making sure your printer settings are set to best quality and the scale is at 100%. Don't want to mess up before you even get started. 😊

Quick Tip: Not sure if your page is scaled correctly? Double check your printer's size settings using a ruler in the section marked Scale Test.

Step 2 PLACE

Place Ring that already fits on each silhouette below to find the smallest size at which no white can be seen between the silhouette and the inside band of the Ring when you look straight down at it.

Please Note: If your current Ring being measured is a different width, or is anything other than a traditional band style (i.e. has gems, twists, etc.), this sizing chart may not work for you.

Step 3 PURCHASE

After you find your Ring's size, head on over to Truvalence.com and use it to order your custom Ring.
