

Glycerin (Glycerol)

INCI NAME: Glycerol

Functions:

Humectant, emollient

Glycerin

Vegetable Glycerin is a clear, odourless viscous liquid produced from plant oils, typically Palm, Soy, or Coconut oil. When we eat any of these oils in our food our stomach makes glycerine, so it's a natural part of our diet.

The glycerin we use is organic, vegan and from sustainable sources.

Attributes:

Glycerin hydrates and softens the skin making it feel smooth and supple. and does not leave any greasy residues.

In creams, glycerin is a moisturizing component. It helps keep the skin hydrated and prevents the cream from drying out.

This ingredient is:

Vegan friendly

Organic

Not tested on animals.

Not genetically modified (non GMO)
