

Shea Butter

Shea Butter is a **VEGAN** product.

Shea Butter is made from Shea Nuts.

The nuts are Cold Pressed with minimal processing.

The resulting raw oil has no solvents or chemicals in it.

It is a creamy coloured solid with a slightly nutty smell.

The Oil is Sourced from a co-operative in Ghana.

The nuts are harvested by foraging natural habitat, an **ORGANIC** environment.

Basically, the nuts are ground, gently heated to release the butter and filtered.

Shea Butter softens, moisturises and revitalises dry skin keeping it looking clear and healthy.

It does not block the pores and can safely be used on all parts of the body.

The effects can last several hours.

It is best applied at night as it can be difficult to apply makeup over it in the morning.
