

Almond Oil

Sweet Almond Oil is a pale, straw-coloured or colourless oil obtained by expressing oil from the ripe seed kernels of the Almond tree.

We buy our Almond Oil from an organic supplier near Valencia in Spain

It is obtained by cold pressing the ripe seed kernels.

Almond Oil is known for its excellent emollient properties

It keeps skin cells healthy, giving protection from UV radiation damage, and promotes smoother, softer skin, free of fine lines. The fatty acids help skin retain moisture and can heal chapped and irritated skin.

This ingredient is vegan friendly, organic and is not teste on animals.
