

## **Vitamin E Oil**

**INCI NAME:** Tocopherol

**Functions:**

Antioxidant, moisturiser

The Vitamin E we use is extracted by cold pressing from Organic Sunflower seeds grown in Ukraine.

Vitamin E Oil can block free radicals which helps slow down the skin's ageing process. It is a strong antioxidant which benefits the skin and stabilises the product.

Vitamin E Oil also helps moisturise and soften the lips.

**Attributes:**

Vitamin E oil contains a mixture of alpha, beta, gamma and delta tocopherols which are 100% natural. It also contains powerful antioxidants that impact cellular functions significantly. It inhibits the growth of free radicals and neutralizes the negative impact of the ones present in the skin. Natural Vitamin E Oil is revitalising and nourishing.

The oil not only penetrates the skin easily, but provides necessary protection to the epidermis (outer layer of the skin). Vitamin E oil is used for the treatment of eczema and psoriasis. The oil is used in creams specifically formulated for topical application, and helps in smoothing wrinkled skin that is a common symptom in most skin disorders.

This ingredient is vegan friendly

It is not tested on animals.

It is organic

It is not genetically modified (Non GMO)
