F.I.R. MOBILE WARMING TECHNOLOGY EN

Proprietary Mobile Warming® technology by Fieldsheer® is specially engineered for cold weather conditions. Fieldsheer® has developed Mobile Warming® comprehensive heating technology to keep you warm and comfortable. Our exclusive Mobile Warming®

heating technology utilizes F.I.R. (Far-Infrared) heat and ultra-fine metal fiber heating elements powered by lightweight, rechargeable, and powerful Lithium-Ion batteries. As heat builds, Mobile Warming® technology reflect and direct heat back towards the body ensuring that you stay warm. The combination of unique materials, construction techniques, and innovative design results in the most advanced heated gear available.

Introduction EN

Thank you for purchasing our battery powered Standard Heated Socks. To ensure proper use and care of your Standard Heated Socks and our Mobile Warming batteries please read this user manual prior to use

Includes EN

MW-370
3.7volt 2200mAh
Lithium-Ion

ASA16U08
Output: DC 4.2v, 0.75A*2
Input : AC 100v-240v

ACC0464
Remote Control

Garment Care EN

To wash, disconnect the battery(s) from the power lead / wire harness, and remove battery from garment(s)

- Lay flat air dry only
- Do not dry clean
- Do not bleach
- Do not wring
- Do not Iron
- Do not dry clean

Battery Storage EN

- Disconnect battery from garment.

- Power off battery(s) if applicable.

- Fully charge battery(s) prior to storage

- Keep battery(s) in cool dry place out of direct sunlight

- Charge every 3 months to maintain battery life. It is important to keep your battery charged when using or storing.

- Do not store Mobile Warming batteries below - 4 °F (- 20 °C)

⚠ WARNING

Do not use battery if you notice a change of shape (lumps), over-heating when charging or if rust or corrosion on the battery connectors is found. Use only with the charging adaptor provided with your product to charge your battery.

Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm

Charging Battery(s)

EN

- Plug Mobile Warming charger into AC wall socket and connect your Mobile Warming® battery(s) to AC charger connectors.

- Red light on the AC charger indicates battery is charging.
- Green indicator light on the AC charger indicates battery is fully charged and ready for use or storage.
- Always charge batteries indoors.
- Always use the compatible Mobile Warming Chargers to charge your batteries. Failure to do so could result in product failure, damage or injury.
- To check for compatible charger, check charger compatibility at <https://mobilewarming.com/pages/battery-care>

Battery Use

EN

IMPORTANT: Fully charge Lithium-ion batteries using compatible mobile warming charger before use.

IMPORTANT: This product is intended to be used by an adult and therefore it is sole responsibility of purchaser to follow detailed instructions and warnings. The Purchaser agrees to indemnify Manufacturer for any unintended use/misuse.

- Avoid running Lithium-Ion batteries completely dead. This will result in performance problems and reduced battery life.
- Lithium-Ion batteries by nature have diminished capacity output in extremely cold temperatures. We recommend keeping batteries inside the garment to maximize battery performance.
- Do not allow Mobile Warming battery(s) to come in contact with water or liquids. If water or other liquids enter the battery interior, immediately unplug the battery from the garment. Do not use if you feel the battery is compromised.

Battery Installation

EN

How to Pair

EN

Note: Socks are pre-paired from the factory and are ready to use out of the box. Somethings you may need to re-pair the socks with the wireless controller do the following:

- 1- Simultaneously press and hold "Power" button on battery and press and hold "Single dot" button on wireless controller for 3 seconds
- 2- Battery indicator light will light up after successful pairing then release both buttons

3.7volt Standard Sock Heat Ratings

EN

Power Ratings Based on Fully Charged Battery and Ambient T

Quick Start Guide

EN

- 1- Fully Charge batteries to 100%.
- 2- Place socks on your feet.
- 3- Press and hold the power button on the batteries for a few seconds. Once it's powered on LED will be Red/100% heat. Repeat for each battery.
- 4- Locate wire harness in battery stash pocket on inside of sock cuff (see drawing).
- 5- Connect wire harness to battery and slide battery(s) in pocket. (See drawing)

6- Now that the batteries are connected to the socks and powered on; use the wireless controller to reach your desired heat settings.

7- To power off Socks, press and hold the power button on each battery until light turns off. If you plan to not use socks for more than a few days, unplug both batteries from the socks.

Warranty Terms

EN

Our warranty applies only to the original purchaser and only for items purchased from an authorized Mobile Warming Dealer.

Limited Two Year Warranty

EN

When you purchase a Mobile Warming brand product from an authorized Mobile Warming retailer within the United States both the construction and electrical heating components of the product are warranted to be completely free from factory defects in materials and workmanship for two (2) years from the date of purchase. If any failure in the construction or the heating function of any Mobile Warming product purchased from an authorized Mobile Warming dealer within the United States occurs due to the manufacturer's defect within two years of the purchase of the product, the product will be repaired at no charge.*

90 Day Rechargeable Battery & Charger Warranty

EN

Mobile Warming Gear rechargeable lithium-ion battery packs and chargers are under warranty from factory defect for 90 days from the initial purchase date. Mobile Warming will repair or replace any battery or charger found to be defective under normal use within the 90 day warranty period.

For more information on Warranty terms, please visit mobilewarming.com/pages/warranty

Legal

EN

Any damage caused to any Mobile Warming® Gear item by misuse, abuse, improper care, accident, normal wear and tear, or the natural breakdown of materials over an extended period of time and use are not covered in this warranty. Any alterations or repairs (attempted or otherwise) performed on any Mobile Warming® Gear item voids any and all warranties offered by Mobile Warming® Gear for that particular item. Mobile Warming® Gear is technical athletic apparel and is not intended for use as work wear or for use in strenuous or demanding circumstances or extreme conditions.

This device complies with part 15 of the FCC Rules and RSS-Gen of IC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

CAUTION: To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device must be used with certified peripherals and shielded cables. All peripherals must be shielded and grounded. Operation with non-certified peripherals or non-shielded cables may result in interference to radio or reception.

MODIFICATION: Any changes or modifications of this device could void the warranty.
