TOOL PURPOSE

Service Carts are heavy-duty mobile storage stations that help carry the load of your work. Refer to the following diagram to become familiarized with all the parts and controls of your service cart. The components will be referred to later in the manual for assembly and operation instructions.

ASSEMBLY

1. Place the upper tray (Fig. 1 - 1) upside-down on a flat work surface.

2. Turn the push handle (Fig. 1 - 2) upside down with the cup holder towards the tray. Using a rubber mallet, tap the push handle down into the grooves on the tray. Make sure the handle is all the way on the tray.

NOTE: To overcome the friction between the two plastic surfaces, rub a little petroleum jelly onto the grooved surface. The two parts should slide together with a few gentle taps of the rubber mallet.

3. Locate two of the legs (Fig. 2 - 1), taking note of the positions of the bottom flanges. Place one nearest the handle and the other diagonally across the shelf tray corner. Using a rubber mallet, tap the legs onto the upper tray until the tab with the three screw holes is in contact with the shelf tray. Repeat this process with the other two legs so all four legs are in solid contact with the shelf tray.

4. Insert and tighten three screws (Fig. 2 - 2) per leg so that the legs are secured in the shelf tray.

5. Now for the lower tray (Fig. 3 - 1). Turn the shelf tray upside down and place it onto the four legs (Fig. 3 - 2). The flanges on the four legs should fit into the depressions in this shelf tray. If all 12 screws were correctly secured through the four legs into the shelf tray, everything should fit together. Gently tap shelf tray onto the four legs until the tabs and shelf tray depressions are in contact with each other.

ASSEMBLY

6. Insert the carriage bolts (Fig. 4 - 1) up through the leg tabs and the shelf tray. Attach the casters (Fig. 5 - 1) by first hand tightening the washers (Fig. 5 - 2) and nuts (Fig. 5 - 3). Once all four casters are in place, go back and use an adjustable wrench to make sure all nuts and bolts are fully tightened and secure.

NOTE: To maximize control, we suggest installing the fixed casters on the same side as the handle, while the swivel casters go on the opposite side of the cart. However, if you prefer to have them the opposite way in order to make sharper turns and pivots, that will also work.

7. Turn service cart upright and install the towel rack (Fig. 6 - 1). Make certain all hardware is tight and that the casters roll properly before adding any weight onto the cart.
