

FANGO CERAMIC BASINS

Our ceramic basins are hand made on a potters wheel of completely lead free materials. The beautiful designs are applied by talented Argentinian artisans. A protective matte glaze is applied to the interior surface of the bowl before firing at 1900° F for 10 hours to produce a stone like appearance. While the outer surface is not glazed, it is waterproof. Each basin is truly one of a kind from the hand spun shaping to the finishing touches.

Care and Maintenance

The ceramic surface is very easy to maintain. Simply clean with a soft cloth or sponge using a mild soap and warm water. Be sure to rinse thoroughly and wipe dry. A general purpose cleaner can be used for more heavy duty cleaning. Avoid strong cleansers with acids or other chemicals that could damage the colors in your basin.
