

## FAUCET FACTS AND CARE

Barclay offers a number of designer finishes for our kitchen and lavatory faucets, as well as our tub fillers and supplies. Choose polished chrome, brass or nickel for a dazzling shine or a more subtle finish such as brushed nickel, rustic oil rubbed bronze or matte black. Select faucets offer brushed or polished stainless finishes. Regardless of your choice, a faucet must be maintained properly to retain the original beauty of the finish.

### Care and Maintenance

- To prevent water spotting wipe dry with a soft cloth after each use
- Wash fixtures with mild soap and water and wipe dry with a soft cloth.
- Occasionally apply a faucet wax to polished surfaces to maintain bright finish
- Never use abrasive cleaners with harsh chemicals such as bleach or ammonia.
- Never use scouring pads as they will damage the surface.
- To restore the shine to an uncoated surface that has oxidized, use a mild metal polish. A light coating of faucet wax after cleaning will prolong the shine.
