USEFUL INFORMATION FOR QUICK RATE USE

Our roof edge trim profiles provide a neat and solid finish. This guide is to help you select the profiles and gutters you need for your project and calculate the correct price.

On our website, www.skylux.eu, you also have access to all dimension tables, technical sheets, assembly manuals and product images.

Need further information? Then call us on +32 (0)56 20 00 00 or send an email to info@skylux.be. Our dedicated team of commercial and technical staff is available to answer your questions.

Price tables

Our pricing tables for roof edge trim have been set out to make them simple and easily understood. Each table is subdivided into columns indicating the type, article number, unit and price per metre.

Price tables for installation products

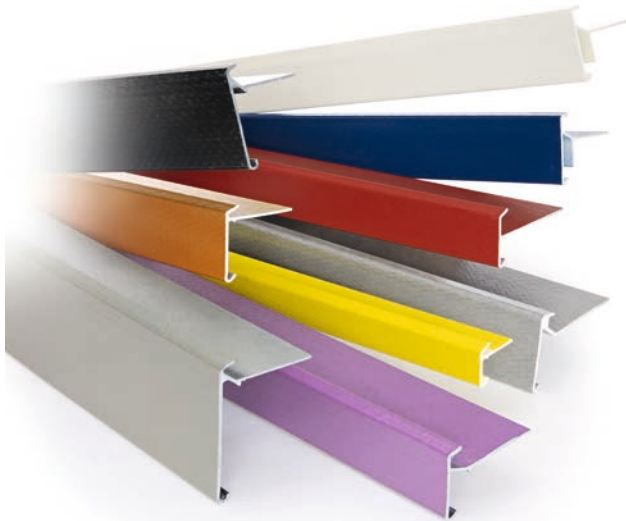

This edition also includes prices for all the items you will need for installing our roof edge trims. Beside each product illustration, you will find the type, article number, unit and price.

PRICE CHANGES AND CURRENT PRICES

This price list is published once a year. Any intermediate price changes are updated in the online version of this price list at www.skylux.eu

Terms and conditions of sale

- We explicitly refer you to our general terms and conditions of sale, technical sheets and installation manuals.
- Prices are in EUR, gross and excluding VAT.

- This price list was compiled with the utmost care. However, we cannot be held liable for any printing or calculation errors, nor for price fluctuations.
- You will always find the latest prices on our website www.skylux.eu.

POLYPROFIL

COMPOSITE ROOF EDGE TRIMS

The Polyprofil roof edge trim profiles are made of composite material. They consist of 35% glass fibres, which are drawn through a heated mould together with polyester resin.

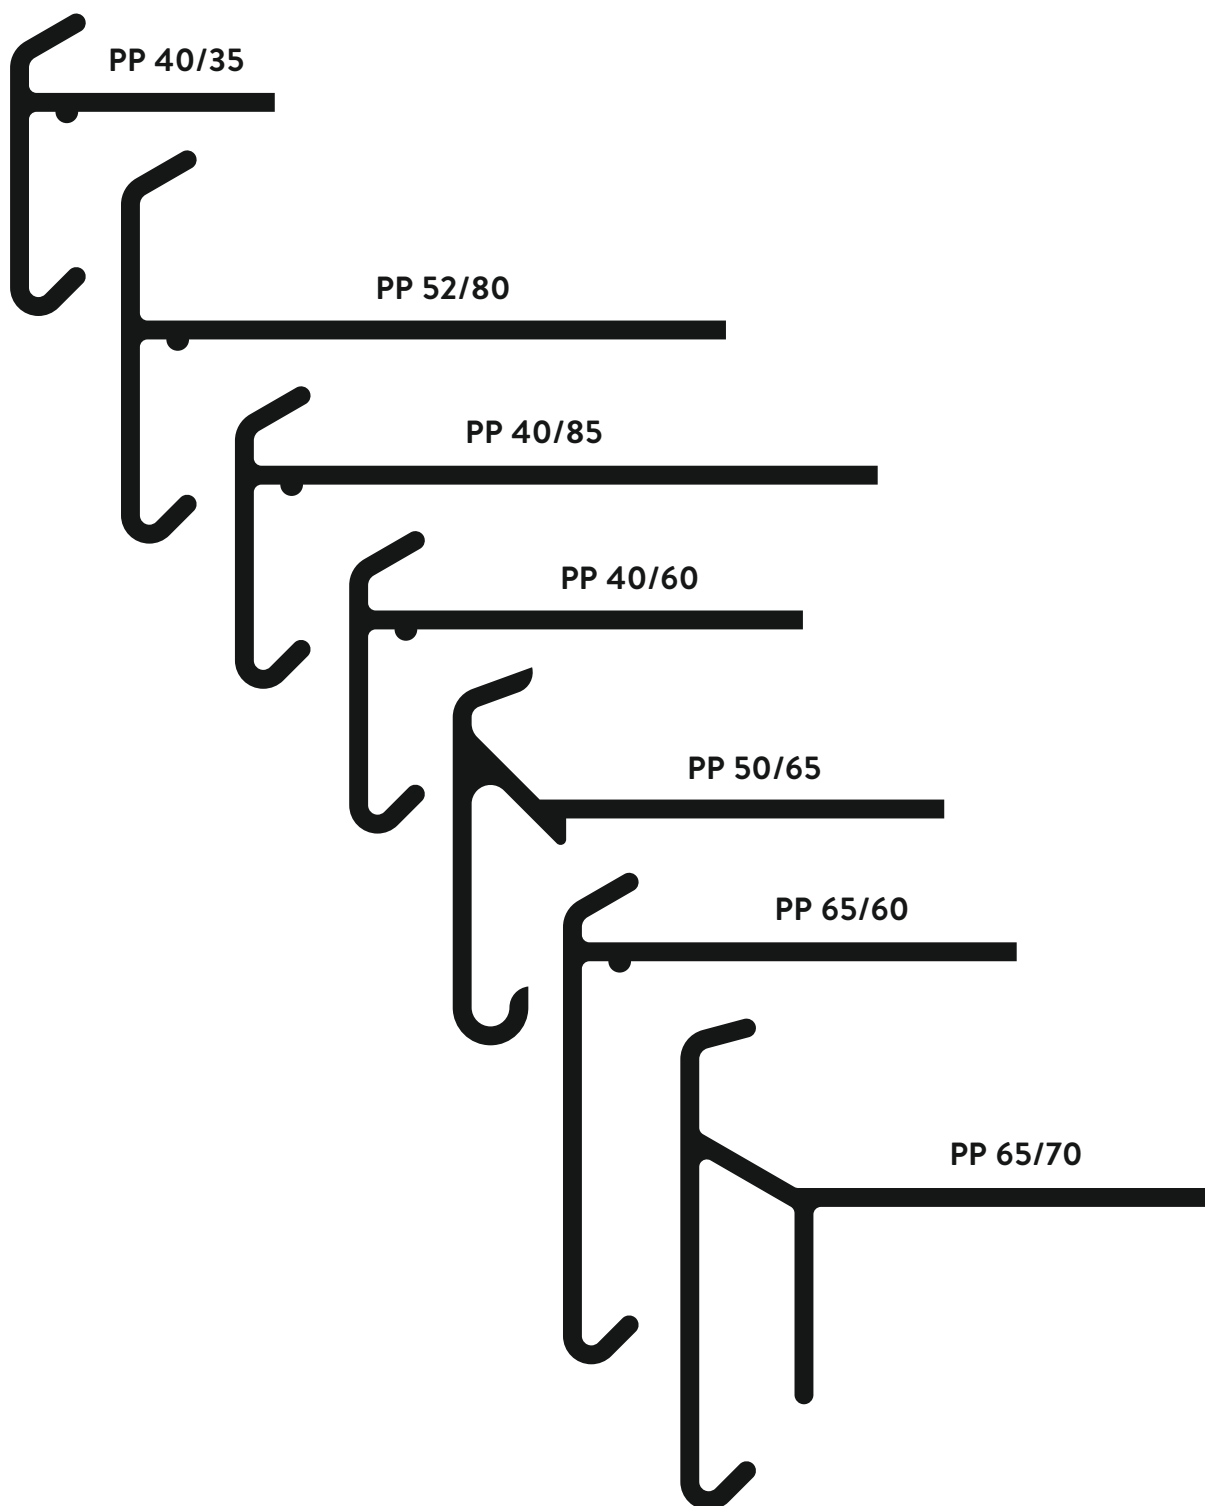

This process is called pultrusion. In the industrial and building sector, this technique is being increasingly used because of its many advantages: limited expansion, impact resistance, chemical resistance, light, etc.

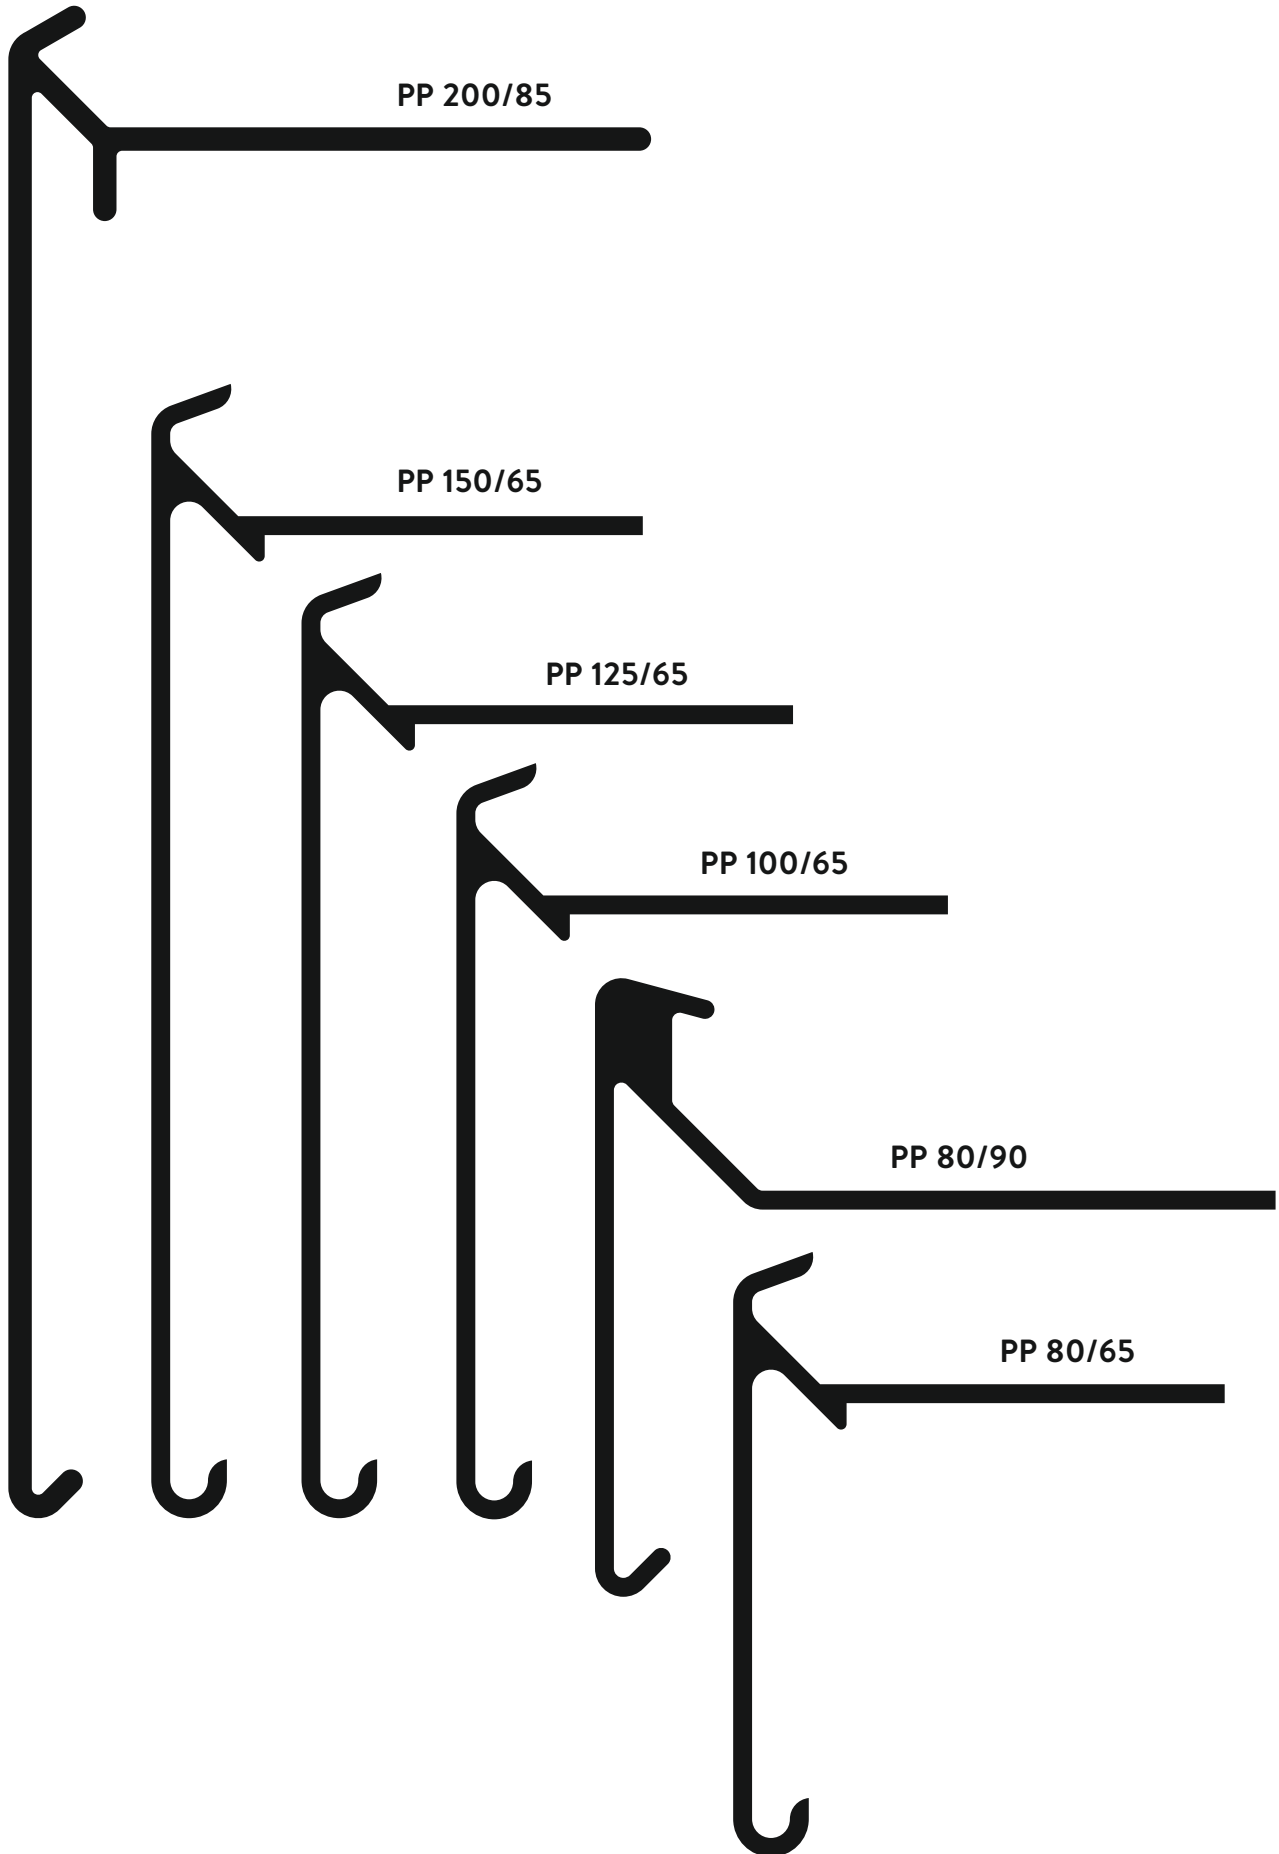

Benefits

- **Solid colouring** in black, grey and white
- **Excellent adhesion** to the roof structure enabling fast and cost-saving assembly
- **Shock-resistant and strong**
Polyprofil does not become damaged during normal transport or storage. The roof edge trim profiles can comfortably withstand knocks and drops – even a ladder that hits hard against the roof edge trims will leave no trace.
- **Weather-resistant**
The high-grade polyester resin displays little sign of wear and is resistant to weather, withstanding the most aggressive sea climate without extra protection. Can be used in industrial, maritime and in agricultural environment. Even where they are cut through, the profiles will not rust or oxidise. The fittings and connecting pieces exhibit the same properties, in contrast to anodised or painted aluminium.
- **Easy maintenance**
Polyprofil roof edge trim profiles are easy to handle and install. No maintenance is needed. The profiles do not rust, and painting is unnecessary.
- **Installation items**
With the angle and connecting pieces supplied free of charge, you can connect the profiles quickly with no additional installation costs (see page 9).
