

LED BOOMERANG INSTALL GUIDE

WARNING: Please refer to local and state laws for the proper use of this product! Improper installation of electrical products such as lighting could cause damage to a vehicle's electrical system or connected devices. Practice extreme caution and follow all established safety procedures. This product could require the handling of high voltage wiring. Electricity could cause injury or death. Professional installation is recommended. Lit Lightz will not be held responsible for any damage or cost whether direct or indirect incurred by the consumer in relation to any Lit Lightz Product. Lit Lightz reserves the right to alter or amend any portion of the aforementioned warranty above.

WIRING DIAGRAM

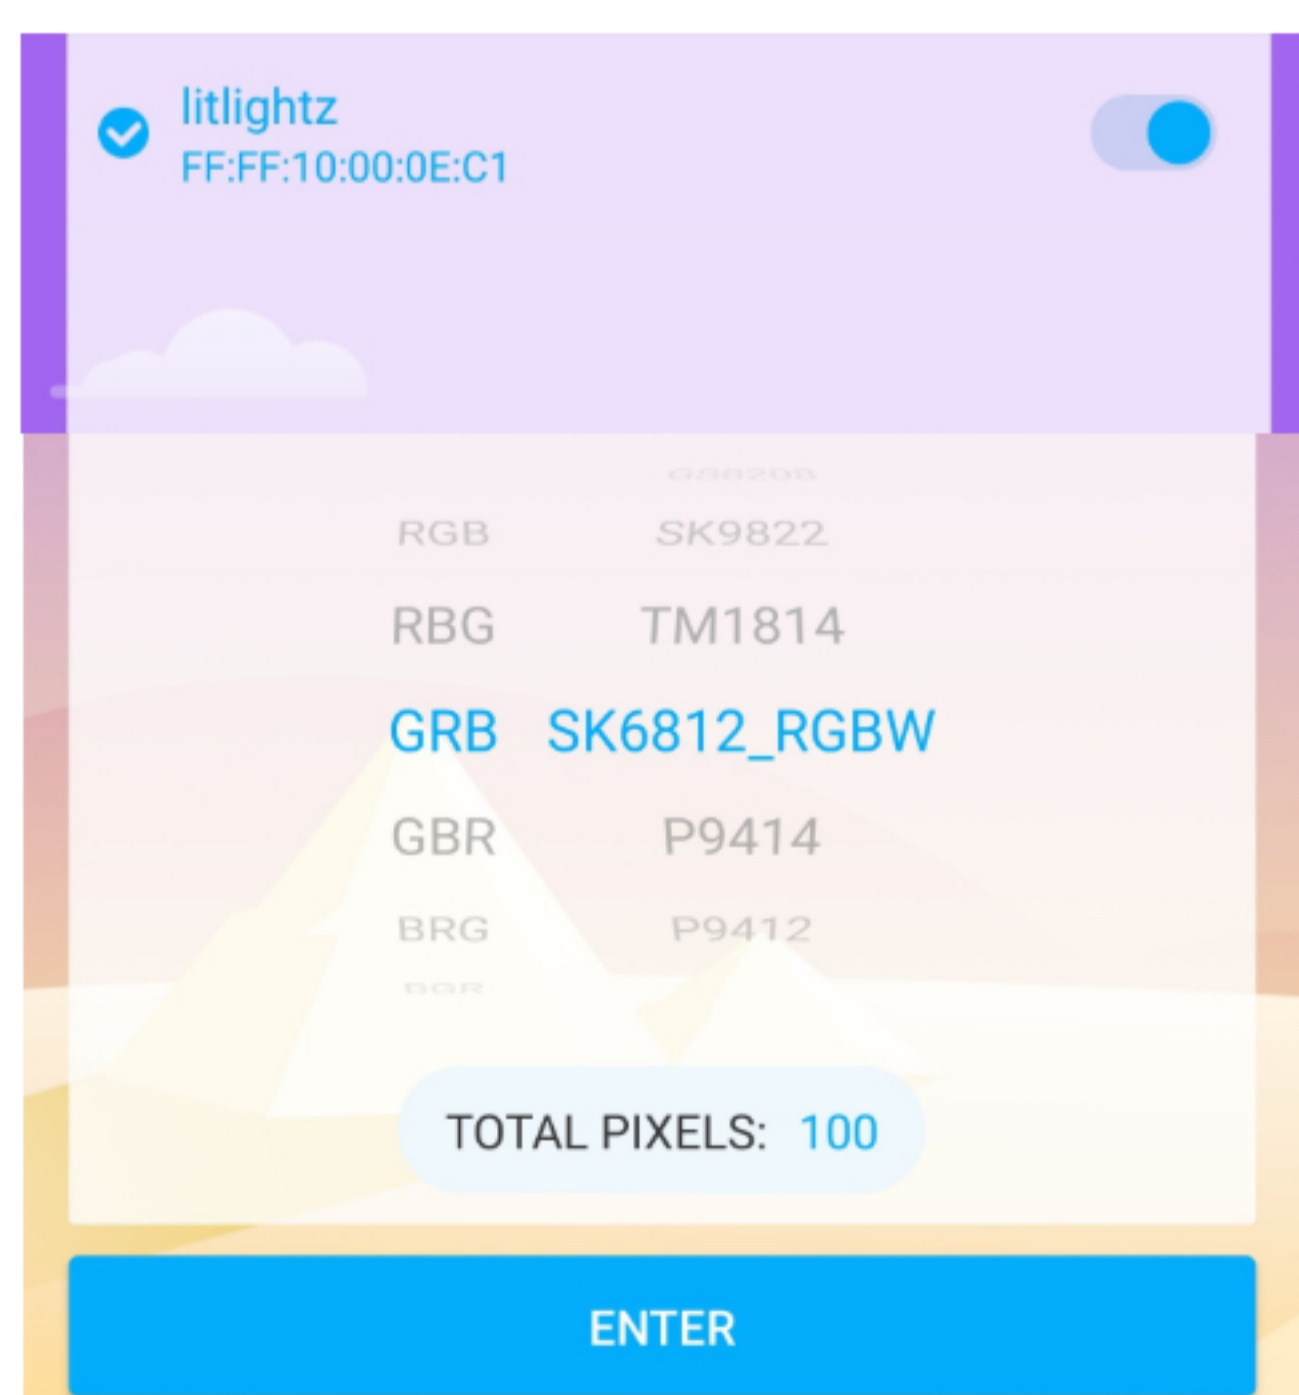

OPENING UP THE HEADLIGHTS

1. Remove the bulbs
2. Unscrew all Philips(+) screws from the back of the headlights.
3. Preheat oven at 220F (wait to insert headlights until preheat is over). Place directly on rack making sure not to touch element above or on the sides. Set timer for 10 minutes.
4. Using the widest Flathead you have, GENTLY pry open the headlights.
5. Once open, unclip original factory LED board.
6. Remove 3 screws holding in the OE LED board.
7. Put in our Color Chasing LED Boomerang boards and add the same screws back to hold it in place.
8. Run wire outside the headlight housing by the method of choice. We suggest you use wire glands.
9. Once all wires have been run outside and the headlight housing is put back together, now will be the time to splice the provided DRL wire(White) and turn signal (Yellow)
10. You will be splicing the provided DRL and turn signal wires in the same manner you did with the original wiring for the Spec-D headlights.

BLUETOOTH SETUP

- Download LED Hue app
- Open app, let it scan for available devices
- Look for "litlightz" or "SP110E"

Settings
GRB SK6812_RGBW
Pixels 100-150

WARNINGS

- You cannot control both Lit Lightz Halos and Color Chasing LED Boomerang boards simultaneously.
- You must have have the DRL OFF if you wish to use the app to change the color of the boomerangs. The DRL will always take priority.
- Do NOT touch the LED's
