

# 2015+ SUBARU WRX FOOTWELL INSTALL

**WARNING:** Please refer to local and state laws for the proper use of this product! Improper installation of electrical products such as lighting could cause damage to a vehicle's electrical system or connected devices. Practice extreme caution and follow all established safety procedures. This product could require the handling of high voltage wiring. Electricity could cause injury or death. Professional installation is recommended. Lit Lightz will not be held responsible for any damage or cost whether direct or indirect incurred by the consumer in relation to any Lit Lightz Product. Lit Lightz reserves the right to alter or amend any portion of the aforementioned warranty above.

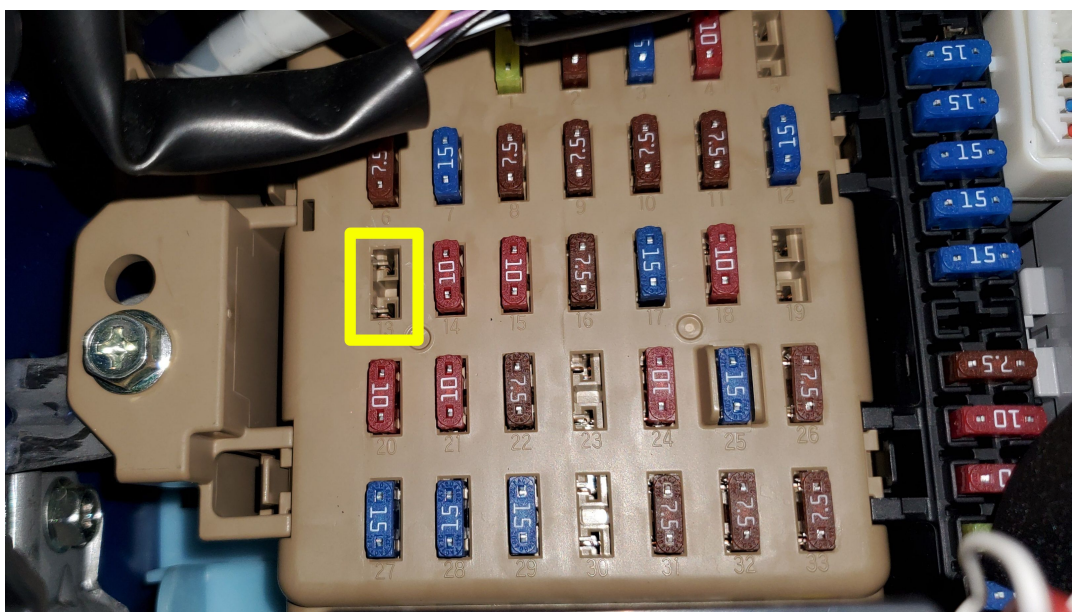

## STEP 1. MOUNTING THE LED STRIPS

Before peeling backing paper to the LED strips make sure to properly clean the area where the strips will be mounted to. We recommend using rubbing alcohol to achieve the best results. In the event, the strips don't adhere properly to the vehicle we recommend using a heavy-duty double-sided tape or zip ties. Now, run the LED strips to mounting locations through the vehicle

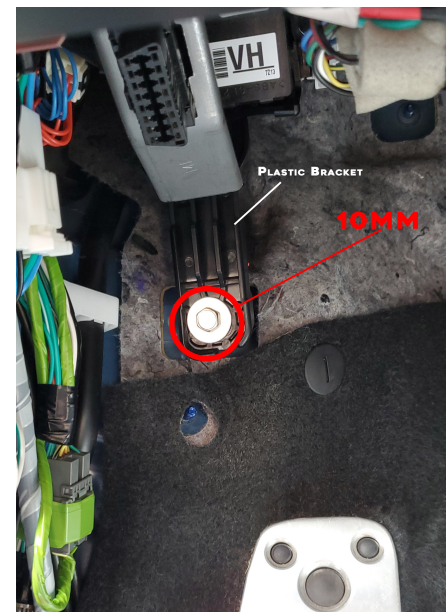

## STEP 2: TESTING YOUR NEW LIGHTS!

Locate "Fuse Box" under steering column left hand side. Find preferred fuse to pull and replace with the "Fuse Tap" Add pulled fuse to the "Fuse Tap" along with provided fuse. You can use a fuse that has constant ON power but will require you to power OFF through the Bluetooth app or use a fuse with REMOTE power ON with key in ignition at all times (recommended) - Bolt the "Black Ground" terminal to proper ground on the car (found behind plastic panel for hood latch)

## WIRING

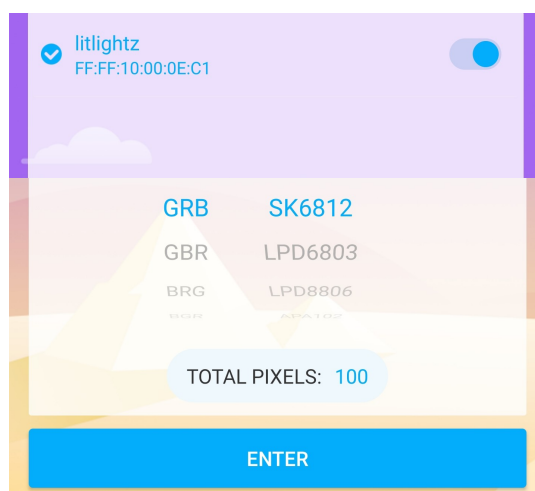

By connecting the Fuse Tap to the location mark on the picture below, your Footwell Kit will turn on when the ignition is on and turn off when the ignition is off.

To connect the ground, start by removing the 10MM bolt. Place the ground terminal behind the bolt so it's touching the metal part not the plastic.

## APP SETUP

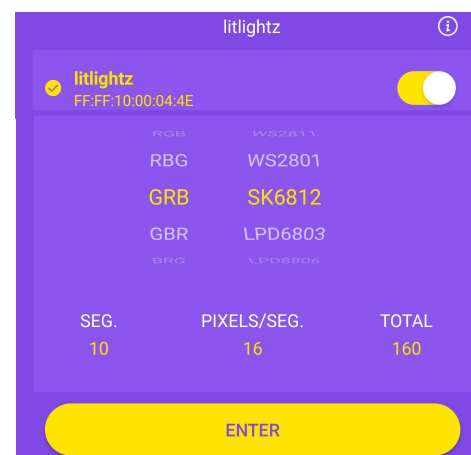

1. Download "LED Hue" app on your smart-phone.
2. The app will automatically scan for Bluetooth devices. 3. Click on "litlightz" or "SP110E" when it appears on the device list on the app.
