

## INFINITY GLOW FOOTWELL INSTALL GUIDE

**WARNING:** Please refer to local and state laws for the proper use of this product! Improper installation of electrical products such as lighting could cause damage to a vehicle's electrical system or connected devices. Practice extreme caution and follow all established safety procedures. This product could require the handling of high voltage wiring. Electricity could cause injury or death. Professional installation is recommended. Lit Lightz will not be held responsible for any damage or cost whether direct or indirect incurred by the consumer in relation to any Lit Lightz Product. Lit Lightz reserves the right to alter or amend any portion of the aforementioned warranty above.

### PARING AND TESTING

1. Connect both 12" LED strips to the power converter (grey heat sink)
2. Connect either the Bluetooth controller or Music controller, to the smallest connection located on the power converter.
3. With a 12v battery source, connect the power and ground terminals accordingly.
4. Open the app, search for "litlightz" or "SP110E" (Bluetooth controller) "SP107E" (Music controller)
5. Set the setting to the following GRB SK6812, pixels: 100 (Same settings apply for both the Bluetooth controller and Music controller).
6. Test fully.

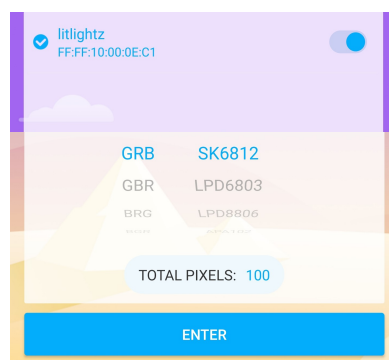

### MOUNTING THE LED STRIPS

1. Each LED strip can be mounted virtually anywhere in the vehicle. Our recommended locations are under the dashboard facing the footwell area, under the driver and passenger seats facing the footwell area, under the back of the driver and passenger seats facing the back seats or even in the trunk.
2. Mount the LED strips with plenty of clearance from any moving parts such as the steering shaft and pedals. You can use the included Adhesive Tape to secure the strips in place, or you can use zip ties. Repeat this step with the remaining strips
3. Run the lead wire coming from each strip to the power converter. Make sure each strip is properly connected. Now, connect the Bluetooth or Music controller to the smallest location on the power converter. Make sure the cables are not close to the seat tracks or anything else that may potentially cut or pinch the cables. Secure any excess wiring using zip ties.
4. Find a safe, secure and dry location to mount the power converter. We recommend mounting the power converter in your center console, under the seat, under the dashboard or in your glove box. Choose the best location for your vehicle.
5. You can power this kit by running the power and ground wires directly to the battery (you will need to extend both power and ground). We recommend you use a fuse tap (not included) Locate the fuse box inside your vehicle. Search for a fuse that will turn the kit on once the car is on. To find what fuse does what, look through your vehicles manual.

### BLUETOOTH SETUP

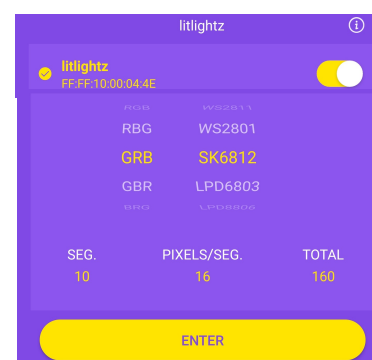

Download LED Hue, from Play Store or App store.

- Open app, let it scan for available devices.
- Search for "Litlightz" or "SP110E"
- Settings: GRB SK6812, pixels: 100

Download LED Chord (Music controller), from Play Store or App store.

- Open app, let it scan for available devices.
- Search for "Litlightz" or "SP107E"
- Settings: GRB SK6812, pixels: 100
