

LiteMat

Light, economical and comfortable

-  Economical and multi-purpose, LiteMat matting has wide ranging uses in light industrial and commercial applications where an attractive, slip resistant and cushioned matting is required.
-  The cushioning effect of LiteMat reduces the risk of damage to items that are accidentally dropped whilst its open grid format dissipates spillages and permits easy drainage.
-  This effective combination makes LiteMat a popular matting for clubs, restaurants, bars and hospitality areas where staff have to stand, spills are likely and breakages possible.

PRODUCT	HEIGHT	STANDARD ROLL OPTIONS	
LiteMat	6mm	10 x 0.6m	10 x 0.91m
