

SparkMat

Textured heat repellent rubber top surface on a foam base

-  Repels sparks and hot metal fragments in industrial workplaces, welding stations, assembly areas, machine shops and wherever heat generating equipment is in use.
-  For the toughest conditions, when the heat is on, SparkMat is a two part, all rubber constructed anti-fatigue matting with special heat repellent properties to withstand sparks and hot metal fragments.
-  SparkMat eliminates the possibility of floors becoming pitted from sparks and hot metal particles.

PRODUCT	HEIGHT	STANDARD MODULE OPTIONS	
SparkMat	14mm	0.6 x 0.91m	0.91 x 1.5m

BENEFITS	FEATURES
High wear resistance and resilience	Rubber top with rubber foam backing
