## Foot Massager Plus

---

USER MANUAL

## Features:

1. Full Airbag double feature design with hinge cut-over feature on top of the device to allow full foot, calf and thigh length massage.
2. Airbag and roller massage offer multiple pressure varieties, with soft to strong intensities and stereoscopic targeting. Massage techniques are innovative and flexible allowing for a wide range of targeting options.
3. Three levels of intensities, five varieties of massage programs and 17 different massage combinations provide comprehensive massage options.
4. Multi-angle massage is possible with the 90° adjustable hinge system at the top of the unit and 20° adjustability in the base of the massager.
5. Jade Heating is included for comfort.
6. Full range of massage points from the foot to the calves to the top of the thigh.
7. Built in safety features such as auto deflate in the case that power is cut to the device the massage airbags will not hold.
8. Auto-Off function to extend the longevity of your device. Massage routines last 20 minutes at a time.
9. Easily removable and washable kneading cloth cover so your massager is fresh every time you use it.

\*Massager is not waterproof image is for creative purposes only

# Troubleshooting Tips

## Troubleshooting Tips:

In rare cases that something goes wrong with your massager, the following are commonly encountered issues and how to solve them. Please review all procedures before calling our office for further instruction.

### The Massager Is Not Working:

**Problem:** Not Plugged

**Solution:** Plug the product in

**Problem:** The Massager has Auto Shut off feature after a 20-minute cycle.

**Solution:** Press the On/Off button

**Problem:** The product has been overused past the 45 min recommended use time

**Solution:** Let product cool for 1-hour, especially if hot to the touch

**Problem:** There is too much weight placed on the massage heads (Such as standing on the massage units)

**Solution:** Remove heavy load from the program

### The product is Hot to the touch (more than warm)

**Problem:** Continuous Over-use of the product has led to its overheating.

**Solution:** Unplug the device for 1 hour before use once more.

**Problem:** The product is being used in extreme temperatures

**Solution:** Place the product in a cooler area for 1 hour before use once more.

## Soft Massage Sound Coming from Product:

**Problem:** This sound is normal and is quieter than any other massager on the market. It is caused by the massage motors.

**Solution:** The sound is normal and not defective.

\*In the case of more severe issues such as defects, excessive noise and other related issues call our offices at Zarifa USA.

### Prohibited Uses:

Do not use the massager in a highly humid environment such as a bathroom or sauna.

Do not use the massager immediately after a sharp change in temperature.

Do not use this massager in an industrial environment or a place with highly corrosive gasses and/or dust build up.
