# Installation Instructions

**Step 1** Properly support your outboard motor according to the guide lines in your outboard engines owner's manual. **CAUTION:** For dual install complete installation of M to S adapter bracket on one side at a time.

**NOTICE:** M to S adapter bracket can be mounted on either the port or starboard side of outboard motor, depending on your preference.

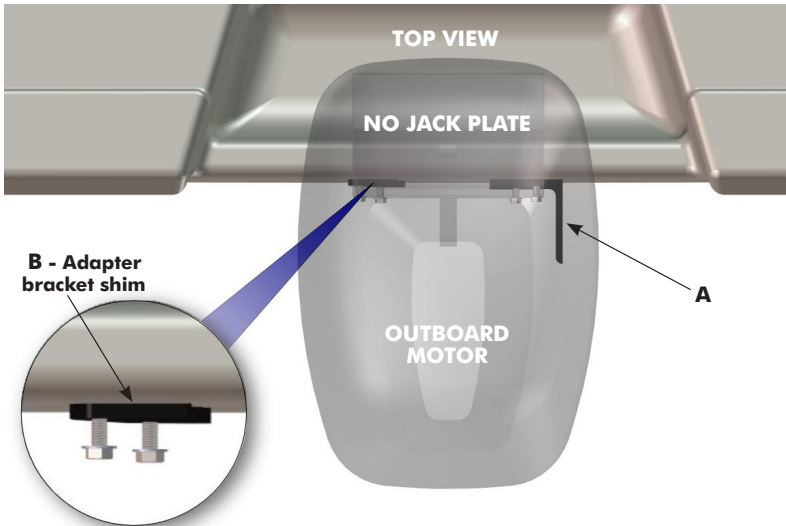

**Step 2** On the side that the M to S adapter bracket (A) will be installed, completely remove the bolts that attach the outboard motor to the transom. Next, loosen the bolts on the opposite side about  $\frac{3}{4}$ " of an inch where shim (B) will be installed later.

**Step 3** Install the M to S adapter bracket in between the outboard motor and transom on the side where bolts have been completely removed.

**NOTE:** Be sure not to fully tighten bolts until shim (B) has been installed on the opposite side or an additional M to S adapter bracket installed for a dual application.

**Step 4** Mount the side mount adapter plate to the M to S adapter bracket (B) following the Universal Bolt Set for all Single & Braced Side Mount Plate Kit instructions Section - **Non Jack Plate Mounting Application for Side Mounts.**
