

RADIO FREQUENCY MICRONEEDLING CONTRAINDICATIONS

Unfortunately not all treatments are for everyone. Please check our contraindications list below to make sure you avoid disappointment.

Conditions that would mean you were not able to have this treatment:

- Pregnant
- Breastfeeding
- HIV/AIDS
- Cancer (all forms)
- Undergoing chemotherapy or immune therapy
- Immunodeficiency
- Lupus
- High blood pressure (uncontrolled)
- Diabetes (uncontrolled)
- Prednisone and other steroid medications (treatment will increase inflammation)
- Heart problems or diseases
- Kidney damage, diseases or problems
- Liver damage, diseases or problems
- Haemorrhagic disease, trauma or bleeding
- Numb or insensitive to heat
- Rosacea
- Active implanted device such as pacemaker or defibrillator

Conditions that need a doctors letter to confirm the treatment is suitable before treatments can begin:

- Epilepsy
- Transplant Anti-Rejection Drugs
- Thyroid Disease
- Heart Disease
- Hypertension (High blood pressure treated with medication)
- Cancer - after 12 months

The list below is of things that require a waiting period until you can start treatments:

- Recent surgery (wait 6 months)
- Recent scars (wait 6 months)
- Open lesions (avoid area)
- Skin diseases (avoid area)
- Infection (avoid area)
- Antibiotics (wait until course completed)
- Inflammation (avoid area)
- Varicose veins (avoid area)
- Prosthesis/silicone implants (avoid area)
- Metal implants/screws (avoid area)
- Metal contraceptive coil (avoid area)
- Depilatory creams (wait 2 weeks)

- Areas being treated with IPL or Laser (wait 2 weeks)
- Areas being treated with Botox® or dermal fillers (wait 2 weeks)
- Suntan (sun must be avoided the entire duration of the treatment regime)
- Chronic inflammation (depending on severity of chronic inflammatory conditions - consider that treatment will increase inflammation and anti-inflammatory medications reduce the effectiveness of the treatment - please discuss with your doctor first.
