

Peel Off Base

THE CHEMISTRY OF EVERY NAIL IS DIFFERENT

we recommend starting your journey by experimenting with how your nails bond to our base. For video tutorials, scan the QR code on reverse

- Shorten and shape nails as desired.
- Push back cuticles with our cuticle tool
- Apply "Clean" to entire nail and allow 15 seconds to dry
- Apply 2 thin coats of our "Peel Off Base" to your nail, ensuring to cover the edges of your nail. Cure each coat for one full click on our "Signature KC Lamp" (45s)
- Apply 1-2 coats of your favourite K&C color, curing fully between each coat.
* If this is your first time doing your own nails, we recommend you apply and cure each layer one nail at a time
- Apply shine, ensuring to cover the edge/end of your nail (capping). Cure for 2 clicks.

Did you get 5-7 days of wear from this mani, with easy water removal?

If yes, no change required! 🥳

Did you experience chipping or peeling? Try this:

- Shorten and shape nails as desired
- Push back cuticles with our cuticle tool
- Lightly buff the surface of your nail with our pink buffer. Remove dust.
- Apply "Clean" to entire nail and allow 15 seconds to dry
- Apply "Prep" to the end 2mm (1/16") of your nail, wrapping around the end
- Apply 2 thin coats of our "Peel Off Base" to your nail, ensuring to cover the edges of your nail. Cure each coat for one full click on our "Signature KC Lamp" (45s)
- Apply 1-2 coats of your favourite K&C color, curing fully between each coat.
- Apply shine, ensuring to cover the edge/end of your nail (capping). Cure for 2 clicks.

For a more traditional gel polish application, apply prep to entire nail. Soak off with acetone.

See reverse for removal instructions →

SIMPLE WARM WATER SOAK REMOVAL METHOD:

- Lightly buff the surface of your mani
- File the ends
- Soak in hot water for 7-10 minutes. A hot bath, or a bowl of bubbly hot water works great! (No... they won't fall off while you are doing dishes or soaking in a hot tub!)
- Use your orange wood stick to start peeling the product away from the cuticle area and peel away gel product.

IF THE PRODUCT IS NOT EASILY LIFTING OFF OF YOUR NATURAL NAIL, DO NOT PEEL! SOAK FOR AN ADDITIONAL 5 MINUTES AND KEEP PRODUCT DAMP WHILE LIFTING

- If you have residue left on your nails, apply "residue remover" to a cotton pad and gently scrub the nail to remove.

IF PRODUCT STILL WILL NOT REMOVE EASILY, APPLY A GENEROUS AMOUNT OF "RESIDUE REMOVER" TO A COTTON PAD AND APPLY TO NAIL, WRAPPING WITH FOIL TO SECURE. REMOVE FOIL IN 10 MIN AND YOUR MANI SHOULD REMOVE EASILY. IF NOT, REPEAT PROCESS UNTIL YOUR MANI IS REMOVED. WASH HANDS, AND APPLY YOUR FAVORITE HYDRATING HAND PRODUCT.

Hey gorgeous, show off those pretty nails!
