Choosing the right K1 Mid-Sole Model

It's very easy to determine which model best suits a company's employees with just a couple of questions:

Will the Ice Cleat be worn in a volatile environment?

Eg. Oil & Gas, Mining, Chemical, Refining

NO

ORIGINAL

YES

INTRINSIC

What kind of footwear is being worn?

Traditional Heeled Work Boot

K1MID

K1MID-INT

Hiker Style or Tactical Boot

K1MID-LP

K1MID-INT-LP

Deep Treaded Boot

K1MID-HP

K1MID-INT-HP

Sneaker / No Heel

K1MID-SLM

Black Strap Series

The K1 Mid-Sole Black-Strap series offers a discreet option for winter traction, ideal for home-care, government, military, law enforcement and first responders.

K1 Intrinsic: Made Different. Made Smart.

When 'Non-Sparking' brass studs are not enough.

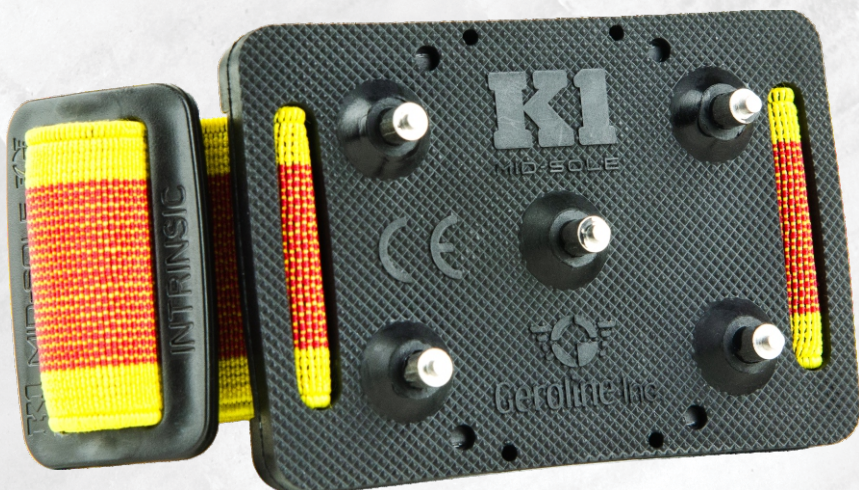

Certification is important. That's why we've done the testing to keep your team safe. **The K1 Intrinsic series is the ONLY Certified Intrinsically safe Ice Cleat in North America.**

Mandated and trusted by oil and gas, utilities, waste water and agriculture for the most volatile environments - where safety matters most.

Burnable Material	Europe (IEC)	USA (NEC)
Gas or Vapour	Zone 0 Zone 1 Zone 2	Class I, Div 1
Dust	Zone 20 Zone 21 Zone 22	Class II, Div 1
Fibres	Same as Dust	Class III, Div 1

In order to reach the required values of combined resistance for potentially explosive production environments, the K1 Mid-Sole Intrinsic Certified Spark-proof model must always be worn together with appropriate ESD footwear.

MORE THAN NON SPARKING. K1 INTRINSIC ICE CLEATS

This is not an Ice Cleat, it's a Safety Policy that gets Real Traction.

A small investment that prevents high-cost outcomes in any industry.

Agriculture	Airports & Aviation	Chemicals	Communications	Construction
 	 	 	 	 
Courier & Postal	Forestry	Government	Homecare & Healthcare	Law Enforcement
 	 	 	 	 
Mining	Oil & Gas	Transport	Utilities & Power	Waste Management
 	 	 	 	 

Traction on demand...

We use the K1 models. Workers put them on and leave them on after the first icy conditions of the fall season. The ice cleats are rotated downward as needed until April 1. If icy conditions return after April 1, workers need to put them back onto their boots for another two weeks.

Safety Leader at Tornado Global Hydrovac

Constant Innovation:

We listened. We innovated. Meet the **new** K1 Slim.

- Designed for flat-soled footwear like sneakers and safety shoes
- Ultra-thin design is comfortable and durable
- Made to be worn all day, indoors and out
