

Chemex

6 cup

The Chemex Coffeemaker is a manual, pour-over style glass-container coffeemaker. Designed to be used together with Chemex-Bonded coffee filters, it makes a clear and flavourful coffee without bitterness and sediment.

1. Unfold the Chemex filter and insert in the top of the brewer, making sure the 3-layered side of the filter is lined up with the pouring spout.
2. Carefully rinse the paper filter with plenty of hot water. This will remove the paper taste from the filter and will help keep it in place. Pour away the water.
3. Place 45g of medium grind coffee into the Chemex. Ensure you dose the coffee evenly so the coffee bed is flat.
4. Pour around 50-100ml of water over the coffee and wait 30 seconds to allow it to bloom.
5. Pour 650ml of water in a slow steady pace using a circular motion rotating from the middle out towards the sides of the Chemex. Try to avoid pouring directly in the center or around the edges of the filter. If the water level nears the rim of the Chemex, pause for a moment to let it drain before continuing.
6. Remove paper and grind from Chemex and serve.
