

# Sowden SoftBrew Tea

The Sowden SoftBrew stainless steel filter has a generous capacity. This allows the tea leaves plenty of room to breathe whilst the hot water gently extracts all the natural flavours, without trapping or squashing the delicate leaves. Add to this the convenience with which the leaves can be removed from the pot by simply taking out the filter whenever you want.

1. Place the stainless steel micro filter inside the jug.
2. Add your preferred amount of tea. The volume will depend on the type of tea you are using.
3. Add hot water to the MAX line. See temperature guide below.
4. Place the lid on the filter. See brew times below. You can increase the brew time for a stronger tea.
5. Ready to serve. Do not remove the filter, just pour your brewed tea straight into the cup.

## Suggested Brew Temperatures and Times

Green Tea - 80°C for 3 minutes

White Tea - 85°C for 3 minutes

Herbal Tea - 100°C for 4 minutes

Black Tea - 100°C for 3 minutes
