

FRIDGESTICKERS

PIXEL PERFECT STICKERS FOR YOUR CAMPER FRIDGE

STEP ONE

Ensure your fridge surface is clean and free of any debris or grease.

STEP TWO

Peel 1-2 inches of the backing paper away from the sticker and use the top edge of the sticker to align with the top edge of your fridge, taking care to ensure it is centred.

STEP THREE

Slowly work your way down the fridge, peeling the sticker away from the backing paper as you go. It can be helpful to use a credit card or a vinyl squeegee to carefully push out any bubbles.

STEP FOUR

If you're happy with how it sits, go over it with something soft to firmly adhere it to your fridge. Throughout the process though, if you do need to take it off to realign the sticker you will be able to do so as long as you are careful, be patient and you'll be just fine!

STEP FIVE

Step back, maybe even open a cold beer or stick on the kettle, bask in your achievement, shout from the roof tops, for you have just applied a Fridge Sticker!
