

If your workplace building was built prior to 2000...

the PCBU in charge of the workplace
must follow the below:

1. Locate any asbestos or asbestos containing materials.

A tool to do this is an
asbestos management survey

2. Prior to any refurbishments or demolition, remove all asbestos.

A tool to do this is an
**asbestos refurbishment &
demolition survey**

3. If asbestos is present, create an **asbestos management plan**.

Asbestos management plans must
follow the *Health and Safety at Work
(Asbestos) Regulations (2016)*

Forensic & Industrial Science Ltd can provide
all the above services and more.
